At home in demanding environments

Pineapple

Work began on the Ryno® range when an NHS trust approached us with a problem:

*"We had been having some major issues with a patient who was very destructive and intolerant of furniture in the dining area."*

Our design team worked with the customer to create a product which would be extremely strong and safe while retaining a stylish, non-institutional feel.

*"It was indestructible and heavy - she was unable to move it very far due to the weight and she was unable to tip it over because of the design. She was certainly unable to break it."*

We achieved what we set out to: a happy customer, reduced anxiety for the patient and a product which we're confident can help to transform other challenging environments.

*"I would highly recommend this product for environments where there are extremely challenging and destructive patients, it is a little bit more expensive, but would be a more economic investment for a service rather than having to make frequent replacements."*

# ryno<sup>®</sup> built to last

## Lifetime value

Ryno products are made to the highest standards and designed to withstand the harshest treatment. While this makes Ryno a premium product range, we believe they represent true value for money over their extended lifetime.

### Lifetime guarantee

Ryno products' 10mm material wall thickness and resilient one-piece construction mean we are able to offer a lifetime guarantee against manufacturing faults.

### Non-flammable

Ryno products are compliant with flammability standard UL94 HB and upholstered pads are compliant with British Standard 5852:2006 ignition source 5.

### Weighted

Optional ballast can be added to all Ryno products to improve safety, prevent misuse and discourage removal.

### Hygienic

Ryno products are anti-bacterial (even beneath the surface) thanks to our unique polymer blend. Their water resistant nature means they can easily be wiped clean and dry quickly, ready to be used again.

### Weatherproof

Our unique polymer blend is UV stabilised and non-upholstered items are water resistant, making them ideal for outdoor use in all weather.

### Made in the UK

With precision manufacturing and meticulous quality control, Ryno products are all designed and made in the UK.

## Colour

seymourpowell

Colour plays a key role in humanising healthcare environments, which is why we enlisted the help of Seymourpowell, one of the world's leading design and innovation consultancies, to assist us in selecting a palette of therapeutic hues.

Whether the aim is to create a soothing and reassuring space or provide inclusive stimulation, our unique colours can help to achieve it.

# Extreme durability

- Tested to BS EN 16139:2013 level 2 for severe contract use (Exceeded the 200,000 cycle pass mark by a further 300,000 cycles)

# Ryno® dining chair

## Key features

- Durable polyethylene one-piece construction provides excellent strength and cannot be weaponised unlike a conventional chair
- Heavily weighted to 50kg as standard to deter misuse. Other weight options available
- Anti-microbial material provides protection throughout the product – not just on the surface
- UV stabilised and water-resistant – ideal for outdoor use (applies to non-upholstered items)
- Strength and stability tested for severe contract use (BS EN 16139:2013 level 2). Exceeded the 200,000 cycle pass mark by a further 300,000 cycles
- Compliant with flammability standards UL94 HB. Upholstered items are tested to British Standard 5852:2006 ignition source 5
- Ergonomically designed to give excellent comfort
- Recessed footwell aides staff in safe de-escalation practices

## Technical details

- Size: 880H x 500W x 620D (mm)
- Seat height: 450mm
- Weight: 50kg (standard model) 12kg (lightweight model)

- Materials: Shell – UV stabilised polyethylene with anti-microbial additive
