MATERIAL/FABRICATION

Rotationally moulded, durable polyethylene, one-piece construction provides excellent strength and stability. Flamed, textured finish further strengthens the fire-retardant, water-resistant, UV-stabilized shell. Anti-microbial material gives high chemical resistance (e.g. ammonia, sodium hydroxide) throughout the product. Item is fully recyclable as polyethylene can be melted down to create a whole new product

DISCLAIMER

Extreme temperature changes (e.g. a cold night followed by a warm sunny day) may cause air inside the product to expand, causing short-term changes to its shape

Due to the nature of the rotational moulding process, flat surfaces on Ryno® products may feature slight undulations which do not detract from the product's strength or durability.
