ELLERN MEDE NG COUCH

For some patients with severe eating disorders, nasogastric (NG) feeding is a necessary clinical intervention, but one that can carry significant risks, particularly during instances of high-intensity resistance.

By limiting patient movement and isolating patients' limbs, the NG couch makes the tube insertion process safer, reducing complications.

Its hygienic single-skin finish with no stitching or seams eliminates dirt-traps and allows the couch to be thoroughly cleaned, maintaining high standards of infection control.

Live service evaluations have ensured that every angle of the NG couch has been optimised to achieve ergonomic integrity and a safer clinical procedure on a stable and safe platform that supports both staff and patients throughout a prolonged NG feed process, and has been ergonomically designed to promote back care.

Product code: 1NG3-100

Dimensions: 905H | 2020W | 860D (mm)

ERGONOMICALLY ANGLED DESIGN

- Allows closer patient engagement, aiding verbal de-escalation
- Provides support for staff, prevents twisting and reduces back injuries

LOWERED CENTRAL SEAT

- Helps to control lateral movement
- Gives staff superior leg control

UPRIGHT SEATING POSITION

- Preserves patient dignity
- Ergonomically designed to support staff in prolonged de-escalation processes

Designed and developed in association with:
