WHICH OPTION IS RIGHT FOR YOU?

Floor fixing

- Installation creates immovable items which minimise disruption and maximise safety
- Room layouts are not easily adjusted
- Relies on a solid substrate for secure fixing (for underfloor heating, please contact us)

Linking

- Items are linked with a heavy-duty steel linking plate
- Enables the creation of fixed layouts without drilling into floors or walls

Weighting

- Makes items difficult to pick up or throw
- Does not require installation
- Rooms layouts can be easily adjusted
