

WAVE FLOOR SCREEN

1WV-1800

1800H | 970W | 300D (mm)

KEY FEATURES

- Provides protection from airborne particles which can transmit viral infections.
- 6mm mild steel powder coated black base plate
- 4mm wipe-clean Plexiglas® screen in an organic wave shape
- Secured with 9 tamper-resistant bolts

MATERIAL/FABRICATION

Our Wave sneeze screens create a subtle physical barrier, providing protection from airborne particles which can transmit viral infections.

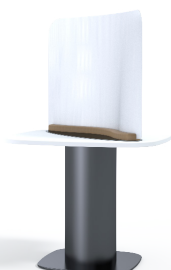

The 6mm mild steel powder coated black base plate provides strength and stability and the 60mm solid beech base forms the 4mm wipe-clean PETG screen in an organic wave shape, secured with 9 tamper-resistant bolts.

Our Wave screens give the flexibility to create non-invasive zones for working or rest, maximising safety while benefitting the aesthetics of the environment.

OPTIONS

- Also available as a table/desk screen (*table not included*)

Wave table/desk screen
