

KEY FEATURES

- One-piece wipe clean hygienic shell
- Made from 50% recycled content (polypropylene)
- Strength and stability tested for general contract use

MATERIAL/FABRICATION

Eddy is a modern update of a multi-functional shell chair. Eddy offers a simple design formed with clean lines and subtle curves to form an ergonomic seat shape, providing flexibility of movement and comfort.

The Eddy range is manufactured in the UK and constructed using Glass Fibre and Polypropylene materials, now made using 50% recycled Polypropylene content. Legs are powder-coated steel (50% recycled content).
