MATERIAL/FABRICATION

Rotationally moulded, durable polyethylene, one-piece construction provides excellent strength and stability. Flamed, textured finish further strengthens the fire-retardant, water-resistant, UV-stabilized shell. Anti-microbial material gives high chemical resistance (e.g. ammonia, sodium hydroxide) throughout the product. Item is fully recyclable as polyethylene can be melted down to create a whole new product.

Our Ryno Open Wardrobe is the latest addition to our popular Ryno® Bedroom range and has been designed to be the same depth and width as Ryno Chest and Ryno Desk.

TEST STANDARDS

- Tested to ANSI/BIFMA X5:5:2012 standards
- Fire retardant to BS 5852:2006 ignition source 5, CAL 133 and UL 94 HB
- Tested to BS EN 16121:2013+A1:2017 Test Level 2 Severe
- UV resistance tested to UV 21+ stating it can withstand 21,000 sunlight hours

DISCLAIMER

Extreme temperature changes (e.g. a cold night followed by a warm sunny day) may cause air inside the product to expand, causing short-term changes to its shape

Due to the nature of the rotational moulding process, flat surfaces on Ryno® products may feature slight undulations which do not detract from the product's strength or durability.
