# HOSPITAL FURNITURE

**Pineapple**

When we design furniture for healthcare environments, the first thing we do is listen. Listen to our customers' unique challenges, their day to day needs and above all, who they need to look after.

Listening is the first step of the 'Pineapple Process', helping us to find furniture that precisely solves the problem. If we don't have something suitable, we create it. With innovative solutions, technical expertise and thoughtful design, we take pride in creating furniture that's exactly fit for purpose.

Our customers get mindfully designed furniture that works effortlessly and looks great. But much more than that, they can go to work knowing they've done everything they can to create an outstanding environment for their patients and staff.

DESIGNED  
FOR PEACE  
OF MIND

# IT ALL BEGAN IN 1975

Our founder, William Hathorn, started our company in a workshop in London, England. Originally trading as Pine Productions, based on the popular wood we used to build our furniture, we crafted strong, durable products using traditional carpentry methods. But as our business grew and we began to provide furniture in a variety of materials for the healthcare market, the name no longer fitted. So, with a nod to our beginnings, we took a bold step and became Pineapple.

As our reputation for designing for demanding environments grew, so did demand for our products and we soon expanded into new premises, doubling our production capacity. We started creating technically advanced furniture for secure settings like mental health units and prisons, as well as lower risk spaces like hospitals, healthcare and education facilities.

## 45 YEARS OF INNOVATION

We continue to create innovative furniture to deliver real-life solutions for our customers and, from initial concept right through to manufacture and delivery, we have full control of the process. Our designs are either manufactured by us or by our carefully chosen partners who produce our furniture under license to meet our precise specification and design.

While our business is now international and our vision more ambitious than ever, we're still a family business at heart. Our work ethic and attention to detail is exactly the same as when we started in 1975.

## FRAMEWORK AGREEMENTS:

We have been supplying furniture to public health organisations for over 35 years. Our products are available to purchase under the following framework agreements:

- NHS Ward and Residential: 2017/S 056-104552
- NHS Shared Business Services: SBS/19/MA/TYX/9363
- NHS Scotland: NP785-19
- HSE 13754 - National Framework Agreement For Generic Furniture

## DELIVERY SERVICE

With our hassle-free delivery service, we place furniture in individual rooms, remove and take away all packaging, leaving you with furniture which is ready for immediate use.

*I need furniture  
that's easy to  
keep clean*

*I need furniture  
that helps my  
patients' recovery*

*I need furniture that  
gives my staff the  
rest they need*

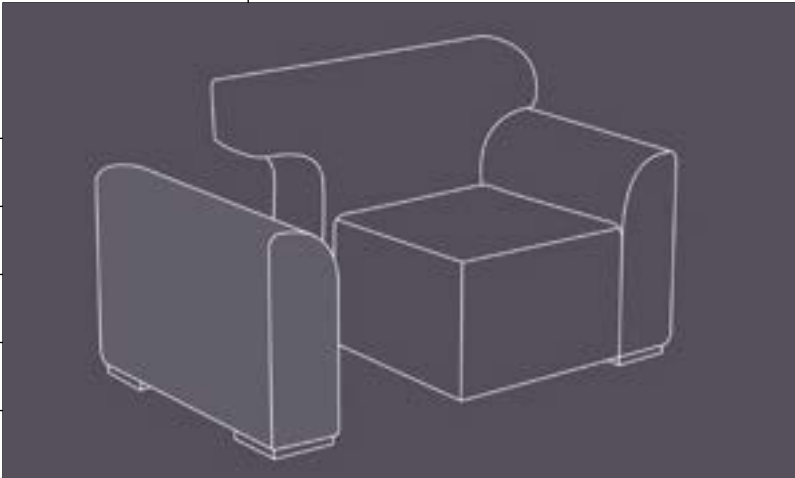

Every customer comes to us with a different set of challenges and we take time to listen and understand. It helps us design the transformative furniture you need, delivering purpose and exceptional value on time and on budget.

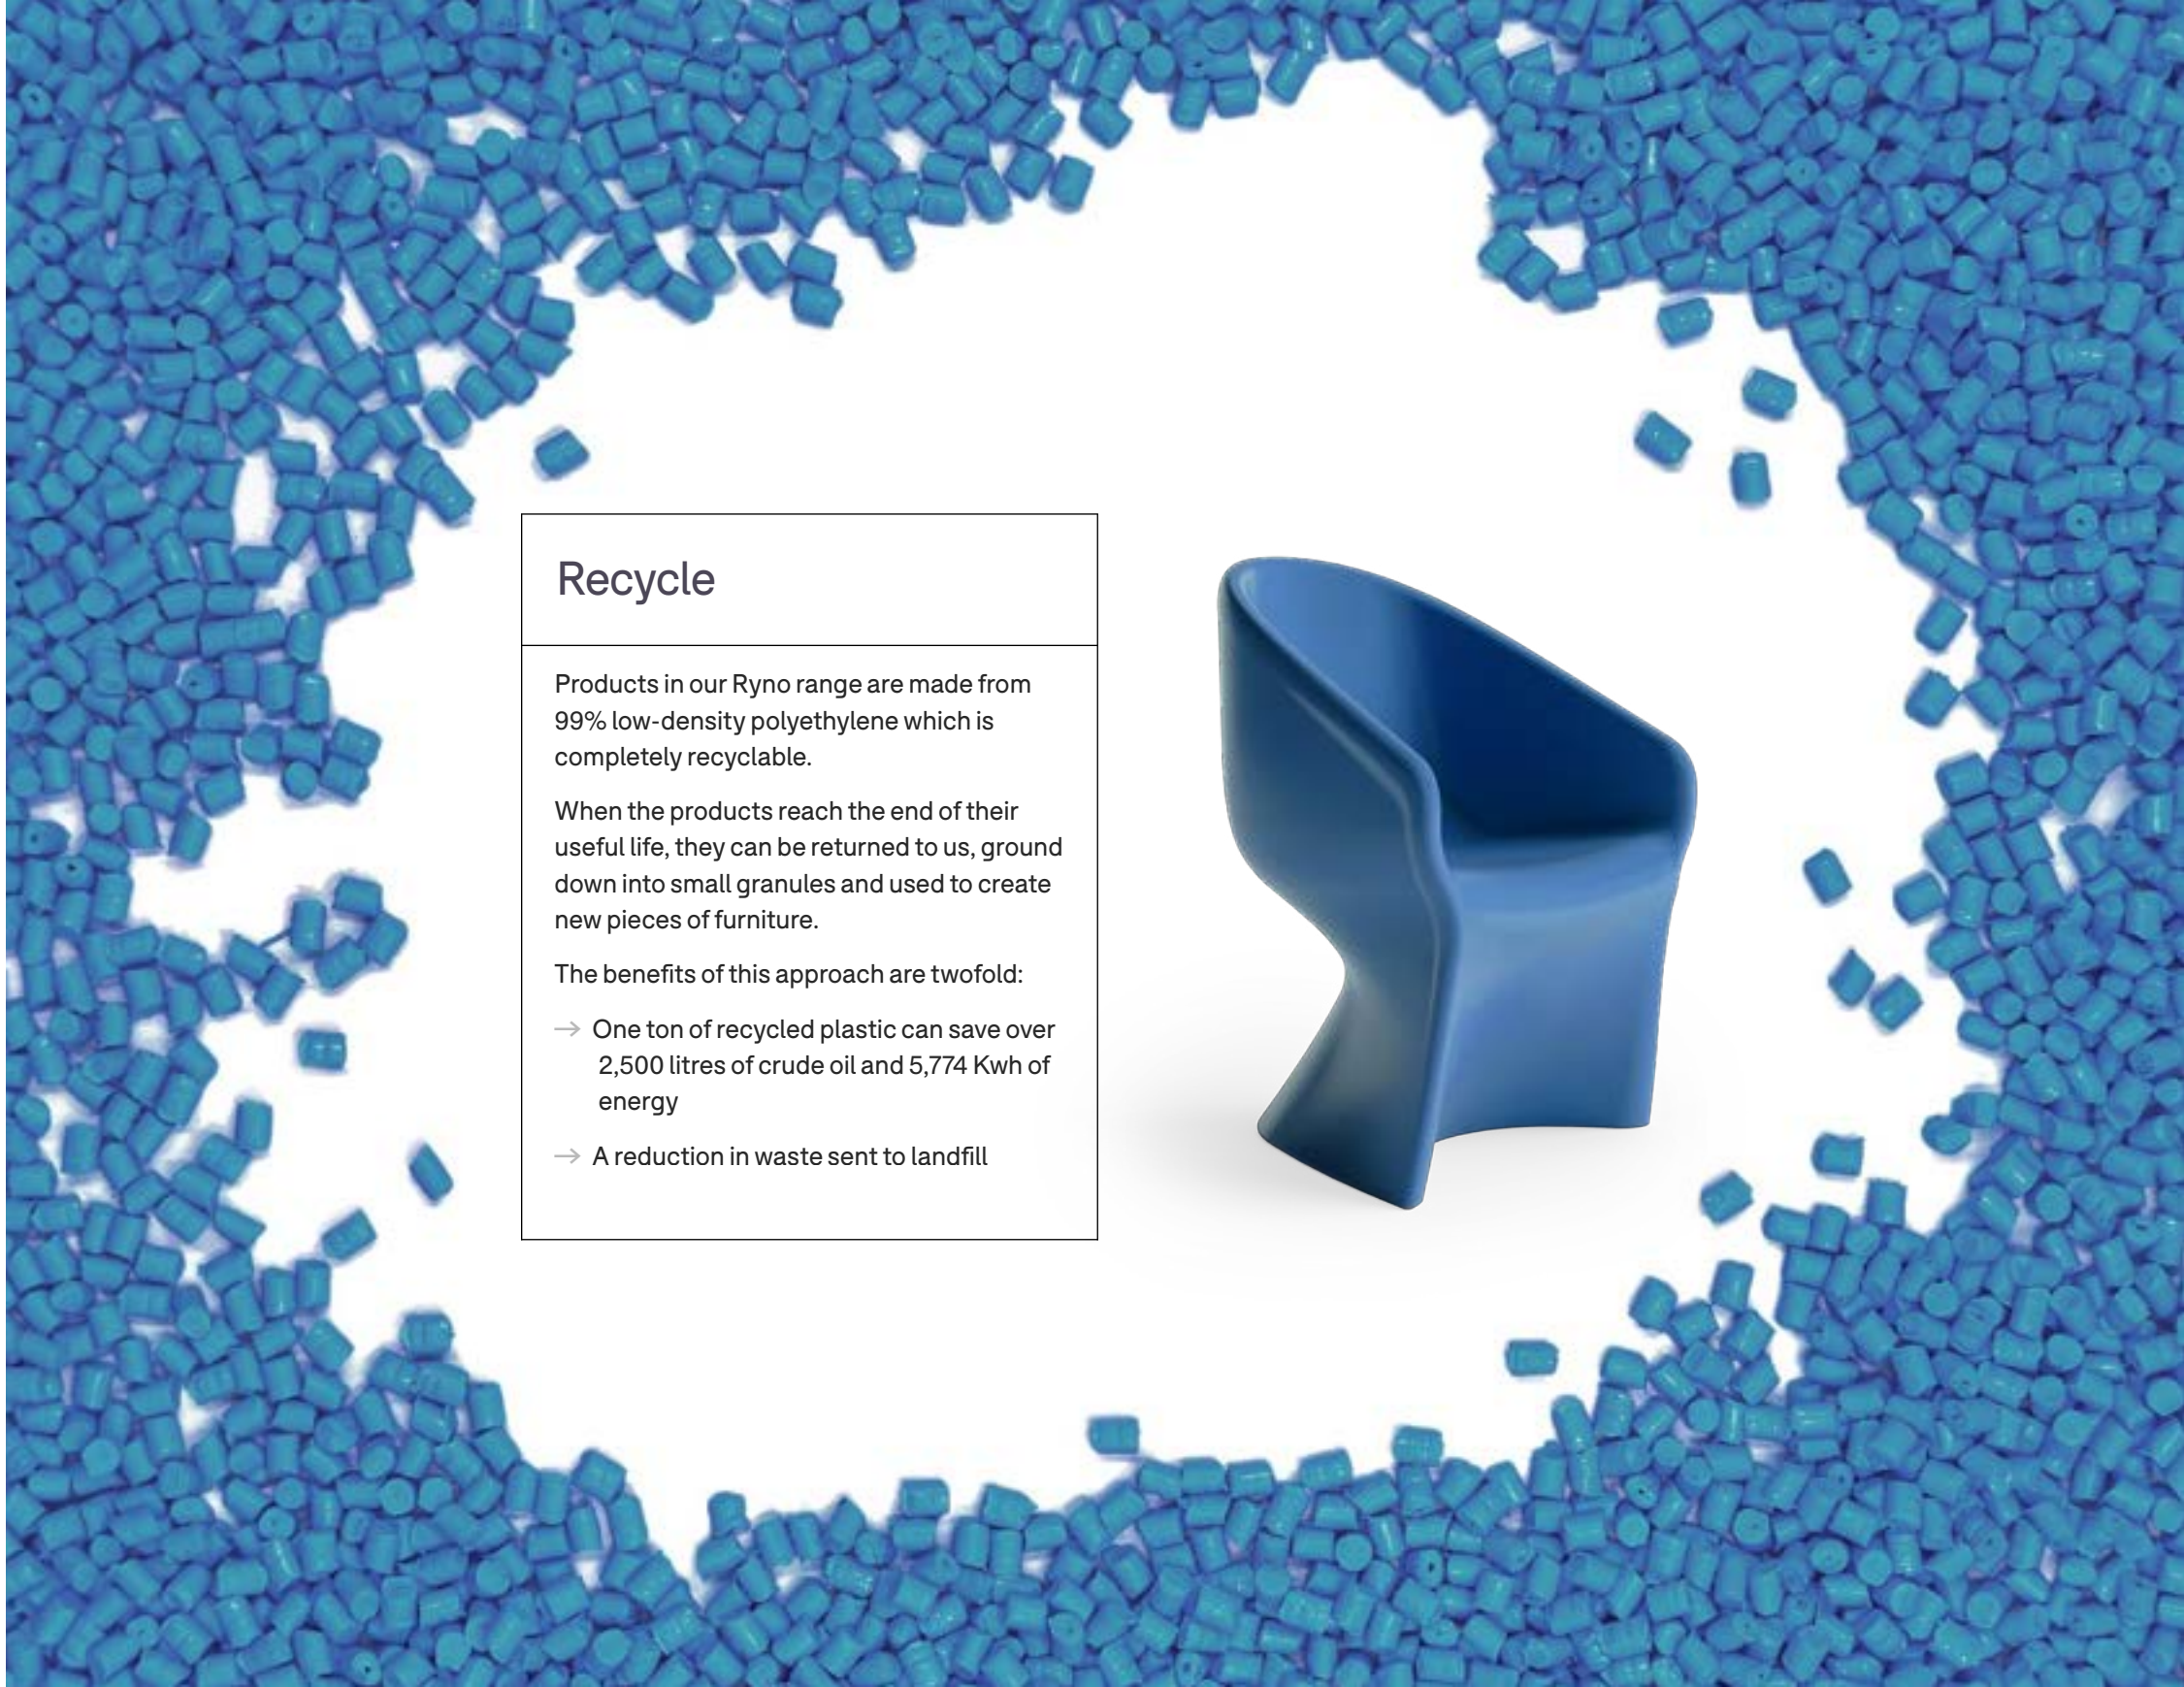

*I need furniture that  
can be easily stored  
and redeployed*

# SUSTAINABILITY

			Re-use
Reduce			
Goal 12 of the UN's 2030 Sustainable Development Agenda urges us all to commit to more responsible production and consumption patterns.			
Our products are manufactured in accordance with these ideals. The demands of challenging environments can result in inadequate furniture being frequently broken, requiring replacement.			
By creating furniture designed and built to last - even under extreme use - we're taking our responsible production seriously.			
			While our products are designed to withstand the rigours of life in challenging environments, we understand wilful damage can still occur.
			Where possible, we design our products to be repaired in sections, like the modular design of many of our sofas which allow arms to be repaired independently of the rest of the sofa.
			This approach helps to maximise the product lifecycle, minimising waste and the impact on the environment.

## Recycle

Products in our Ryno range are made from 99% low-density polyethylene which is completely recyclable.

When the products reach the end of their useful life, they can be returned to us, ground down into small granules and used to create new pieces of furniture.

The benefits of this approach are twofold:

- One ton of recycled plastic can save over 2,500 litres of crude oil and 5,774 Kwh of energy
- A reduction in waste sent to landfill

# TESTING

Flame retardance			
	<p>Flame retardant to contract level, all of our upholstery and fabrics meet BS 7176:2007 Source 0, 1 and 5 [Formerly BS5852 Source 0, 1 and 5].</p> <p>We also supply fabric and mattresses which meet Crib Source 7.</p> <p>This allows you to purchase with complete confidence knowing that all our products and fabrics are fully tried and tested.</p>		
		<p>All of our furniture is strength and stability tested to contract level.</p> <p>The picture above shows the Harrier sofa undergoing durability testing to BS EN 16139:2013 Level 2 (severe contract use).</p> <p>In this demanding test, seat and back durability is tested at least 100,000 times.</p>	<p>Static load testing</p> <p>Our products are designed to withstand severe daily treatment. One of the ways we test this is the static load test.</p> <p>During this test, a heavy weight is applied to the seat of the product</p> <p>Many of our products have been tested to withstand a 500kg static load</p>

# INFECTION CONTROL

**Ryno® products** are made from our unique polymer blend which contains an anti-bacterial additive to inhibit bacterial growth.

Unlike surface treatments which may wear away or become scratched, this anti-bacterial protection works throughout the product.

A number of our products feature a hygiene gap between the back and seat of the chair which prevents dust and dirt becoming trapped, making them easier to clean thoroughly.

We apply an **anti-bacterial lacquer** where appropriate, which kills 99.9% of bacteria (including MRSA, C. diff and E. coli) within 24 hours by providing no source of nutrients which they need to survive.

Our Sovie bed ranges features a single-piece mattress tray with no joints (into which liquid may seep) and components are wrapped in a thermoplastic shell which kills 99.8% of e-coli and MRSA (most common hospital bacteria) over a 24-hour period.

Our upholstery ranges include anti-bacterial treatments which physically damage the cell walls, with tests showing a 99.99% reduction in MRSA and a 99.98% reduction in E. coli over 24hrs.

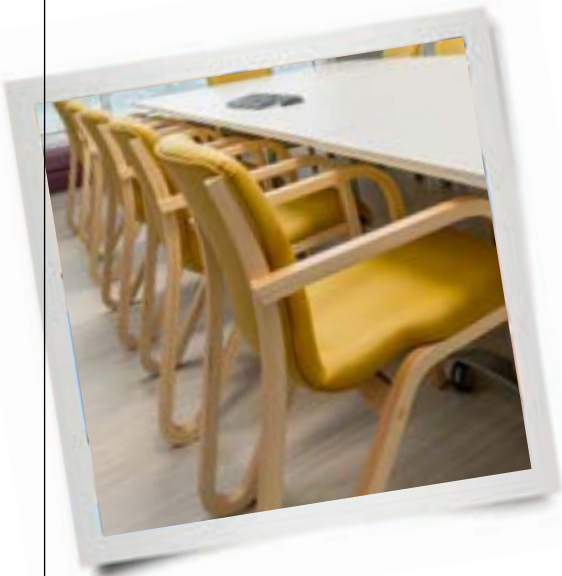

We were asked to help create a vibrant environment which delivered on comfort

*The design team wanted to make the patient experience less stressful*

# NHS Lothian

The Haematology Centre at Western General Hospital in Edinburgh has benefitted from recent refurbishment, using furniture from Pineapple to create an efficient modern space where exemplary hygiene levels are key.

Previously separate spaces, the inpatient and day case patient facilities have been brought together to create an integrated service with the aim of improving patient experiences and staff efficiency.

Following a consultation with staff and patient representatives, the architects' design team set out to give the Haematology centre a new identity, and make the patient experience less stressful.

The furniture was specified in a yellow and purple colour scheme which helps to define a distinct identity. The water-resistant upholstery is easily kept clean, and is protected by a non-leaching antimicrobial coating which is 99.98% effective against bacteria and viruses including MRSA, E.coli and Coronaviruses.

NHSLOTTHIAN

We were asked to help create a vibrant environment which delivered on comfort

# THE CHRISTIE HOSPITAL

*A bright, vibrant space which was as far from a 'hospital feel' as practically possible*

The goal for this oncology service for young people was to create a bright, vibrant space which was as far from a 'hospital feel' as practically possible while remaining practical and hygienic.

This combination was achieved with informal seating options upholstered in vividly coloured vinyl fabrics which have water-resistant and anti-bacterial properties.

Modular Ohio chairs provide banks of seating, while Boden beanbags offer a more relaxed option.

In each bedroom, compact Recondo recliners with castor wheels (brakes on each wheel) offer multi-functional seating.

**RECEPTION & WAITING**

**COMFORTABLE, STYLISH**

**AND BUILT TO LAST IN**

**HIGH-TRAFFIC SPACES**

# EMERGENCY DEPARTMENTS

Durable furniture  
designed to maximise  
safety in high-traffic  
environments.

WAVE SCREENS
