# BUILT TO LAST

## Flame retardance

Flame retardant to contract level, all of our upholstery and fabrics meet BS 7176:2007 Source 0, 1 and 5 [Formerly BS5852 Source 0, 1 and 5].

We also supply fabric and mattresses which meet Crib Source 7.

This allows you to purchase with complete confidence knowing that all our products and fabrics are fully tried and tested.

## Durability testing

All of our furniture is strength and stability tested to contract level.

The picture above shows the Harrier sofa undergoing durability testing to BS EN 16139:2013 Level 2 (severe contract use).

In this demanding test, seat and back durability is tested at least 100,000 times.

## Static load testing

Our products are designed to withstand severe daily treatment. One of the ways we test this is the static load test.

During this test, a heavy weight is applied to the seat of the product

Many of our products have been tested to withstand a 500kg static load
