MATERIAL/FABRICATION

Rotationally moulded, durable polyethylene, one-piece construction provides excellent strength and stability. Flamed, textured finish further strengthens the fire-retardant, water-resistant, UV-stabilised shell. Hygienic wipe-clean surface, quick to dry ready to be used again quickly. Anti-microbial material gives high chemical resistance (e.g. ammonia, sodium hydroxide) throughout the product. Item is fully recyclable as polyethylene can be melted down to create a whole new product.

TEST STANDARDS

- Fire retardant to CAL 133 and UL 94 HB, Crib 5, DIN 66084
- UV resistance tested to UV 21+ stating it can withstand 21,000 sunlight hours
