Reduced-ligature
washrooms

in collaboration with **ONVO**

Pineapple

As one of the most private areas in a mental health facility, a bathroom is also one of the highest risk spaces.

Lower levels of supervision relative to other spaces combine with a greater number of ligature risks to create a potentially dangerous environment for people in crisis.

In order to protect people from harm, bathroom products must be designed to be as safe as possible by minimising ligature risks, and like all healthcare environments, infection prevention and control are of key importance.

The Arc washroom range sensitively addresses ligature concerns through its flowing curved design, while lending a serene aesthetic to its surroundings.

Manufactured from a non-porous, stain resistant solid surface material, Arc products offer excellent hygiene properties. The seamless design eliminates dirt-traps which are commonly found in traditional fixtures.

Arc products are secured with innovative non-visible fixings, minimising opportunities for tampering.

REDUCED-LIGATURE DESIGN

- Seamless design
- Sloping edges
- Radiused corners
- Hands-free taps

HYGIENIC SEAMLESS SURFACE

- No dirt traps
- Non-porous surface
- Stain-resistant material

NON-VISIBLE FIXING METHOD

- Innovative magnet-activated fixing method
- Fixings are totally hidden to prevent tampering

→ 250kg clamping force per fixing ←

QUICK AND SIMPLE TO MAINTAIN

- Innovative sliding mechanism provides access for installation and maintenance
- Swiveling copper piping facilitates movement

ARC BASINS
