

# FURNITURE FOR MENTAL HEALTH ENVIRONMENTS

Designed for  
peace of mind

**Pineapple**

## IT ALL BEGAN IN

Our founder, William Hathorn, started our company in a workshop in London, England. Originally trading as Pine Productions, based on the popular wood we used to build our furniture, we crafted strong, durable products using traditional carpentry methods. But as our business grew and we began to provide furniture in a variety of materials for the healthcare market, the name no longer fitted. So, with a nod to our beginnings, we took a bold step and became Pineapple.

As our reputation for designing for demanding environments grew, so did demand for our products and we soon expanded into new premises, doubling our production capacity. We started creating technically advanced furniture for secure settings like mental health units and prisons, as well as lower risk spaces like hospitals, healthcare and education facilities.

# 1975

# TODAY

## 45 YEARS OF INNOVATION

We continue to create innovative furniture to deliver real-life solutions for our customers and, from initial concept right through to manufacture and delivery, we have full control of the process. All of our designs are either manufactured by us or by our carefully chosen partners who produce our furniture under license to meet our precise specification and design.

While our business is now international and our vision more ambitious than ever, we're still a family business at heart. Our work ethic and attention to detail is exactly the same as when we started in 1975.

THE PINEAPPLE PROCESS

We listen

01

We listen more widely and more deeply to our customers' unique set of challenges; they might be safety concerns, maintenance issues or limited space. With forty years of experience under our belts, we're good at listening and know the right questions to ask.

02

understand

Drawing on our extensive knowledge gained over the last 50 years, we identify solutions that fit each brief. Then we define exactly what your furniture needs to deliver for your environment, taking physical, functional and emotional requirements into account.

03

match

Now we understand your environment and precise needs, we can match you with the right products that will solve them. With hundreds of pieces to choose from, there is usually a solution that fits but if there isn't, we'll work with you to create one.

04

We deliver mindfully designed furniture that is exactly fit for purpose. We continue to learn from each new project, building the knowledge we gain into our new and existing product ranges to make them safer than ever.

This vibrant campus is designed to be a safe, therapeutic space for young people on juvenile probation.

# RADIUS CAMPUS

RADIUS is a non-profit organisation for young people on juvenile probation which aims to strengthen family and community relationships.

The campus provides 24 beds for youths aged between 12 and 18 years old, offering mental health and substance abuse treatment as well as building family support plans for their transition into the community.

In the vibrant community space, Rock tables and chairs provide space to work and play. The frames are made from solid Birch, cross-braced for strength, and the

table tops and seats are constructed from plywood, with a durable laminate surface.

Snug Plus modular sofas provide a comfortable place for residents to relax together in the TV lounge. Snug's reinforced construction ensures they are strong enough to withstand the rigours of challenging environments.

In the bedrooms, Harby Plus Open cabinetry provides safe and durable storage, with reinforced shelves and reduced-ligature design features as standard.

The robust and durable Ryno® range excels outdoors thanks to its water-resistant and UV stabilised materials

# LINCOLN COUNTY HOSPITAL

Two state-of-the-art mental health wards have recently opened at the Peter Hodgkinson Centre situated at Lincoln County Hospital, enabling Lincolnshire Partnership NHS Foundation Trust (LPFT) to broaden its scope and offer invaluable care and support to adults who need mental health crisis support.

Ryno® club chairs and Ryno® pedestal tables were chosen to provide safe seating for the outside courtyard areas. The pedestal tables were securely fixed to the floor using our patented hidden fixings methods, while the Ryno® Club chairs were heavily weighted (to 62kg) to allow them to be repositioned without compromising safety.

The Club chair, distinguished by its sloped arm and curved back design was chosen for its reduced-ligature design, helping to create a safer environment for patients.

Our robust and durable Ryno® range excels outdoors thanks to its water-resistant and UV stabilised materials which provide dependable long-term durability. Combining an inspiring aesthetic with an emphasis on safety and comfort, Ryno products can contribute to environment that promotes healing and wellbeing for adults facing mental health challenges.

Bespoke fitted cabinetry and brightly coloured furniture helped to create a safe, homely environment for this child-focused home.

# LANSDOWNE CHILDREN'S HOME

Lansdowne Children's Home is a purpose-built secure children's home in East Sussex which provides accommodation and education facilities for young people, focusing on the educational, emotional and physical wellbeing of the children.

For the TV rooms and other communal spaces, we designed and installed bespoke fitted cabinetry to provide securely lockable storage space. The blues, greens and muted pink finish of the cabinetry follows the therapeutic colour palette seen throughout the building.

Ryno® dining chairs (weighted to 56kg to prevent misuse) were coupled with Cumulus Plus tables (weighted to 71kg) to provide safe and stylish furniture for dining or other activities.

All-foam Cascade Plus chairs provide soft seating with a tear-resistant anti-vandal cover. Heat welded seams make the chairs totally water-resistant which means they can be thoroughly cleaned and dry quickly, ready to be used again.

# SUSTAINABILITY

From operational efficiencies like solar power generation to seeking continual product-related improvements, our Sustainability department is dedicated to enacting our carbon reduction plan to help minimise our impact on the environment.

## Carbon Reduction Plan

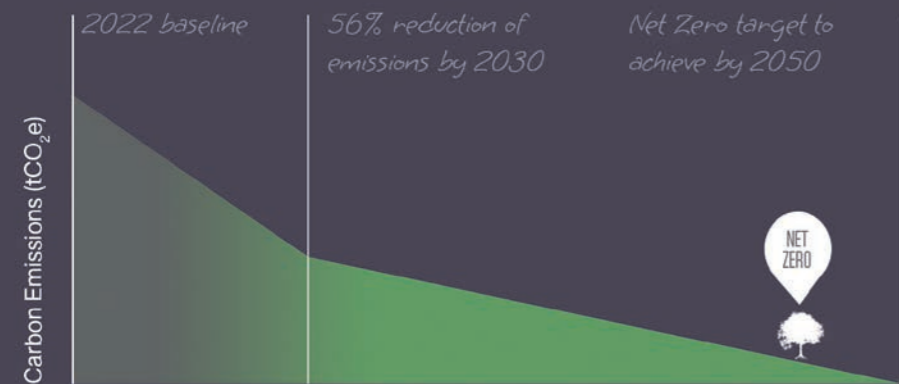

In our ongoing commitment to environmental responsibility, we have set a target to reduce our carbon emissions by 56% by 2030.

We measure Scope 1 (direct emissions from business operations), Scope 2 (emissions associated with energy generation) and Scope 3 (indirect emissions from supply chain and consumer waste streams).

Our Carbon Reduction Plan is already yielding significant achievements, including a 12% decrease in our overall greenhouse gas emissions from 2022 to 2023.

## Our Net Zero Journey

# HIGHLIGHTS

UK office energy generated by solar panels.

Decrease in CO<sub>2</sub> emissions from baseline.

Donated to charitable causes.

Decrease in packaging by weight.

Spent volunteering, improving biodiversity.

Eco products launched this year.

# TESTING

## Flame retardance

Flame retardant to contract level, all of our upholstery and fabrics meet BS 7176:2007 Source 0, 1 and 5 [Formerly BS5852 Source 0, 1 and 5].

We also supply fabric and mattresses which meet Crib Source 7.

This allows you to purchase with complete confidence knowing that all our products and fabrics are fully tried and tested.

## Durability testing

All of our furniture is strength and stability tested to contract level.

The picture above shows the Harrier sofa undergoing durability testing to BS EN 16139:2013 Level 2 (severe contract use).

In this demanding test, seat and back durability is tested at least 100,000 times.

## Static load testing

Our products are designed to withstand severe daily treatment. One of the ways we test this is the static load test.

During this test, a heavy weight is applied to the seat of the product.

Many of our products have been tested to withstand a 500kg static load.

# INFECTION CONTROL

**Ryno® products** are made from our unique polymer blend which contains an anti-bacterial additive to inhibit bacterial growth. Unlike surface treatments which may wear away or become scratched, this anti-bacterial protection works throughout the product.

We apply an **anti-bacterial lacquer** to exposed wood surfaces which kills 99.9% of bacteria (including MRSA, C. diff and E. coli) within 24 hours by providing no source of nutrients which they need to survive.

Our upholstery ranges include anti-bacterial treatments which physically damage the cell walls, with tests showing a 99.99% reduction in MRSA and a 99.98% reduction in E. coli over 24hrs.

A number of our products feature a hygiene gap between the back and seat of the chair which prevents dust and dirt becoming trapped, making them easier to clean thoroughly.

Our Sovie bed ranges features a single-piece mattress tray with no joints (into which liquid may seep) and components are wrapped in a thermoplastic shell which kills 99.8% of E.coli and MRSA (most common hospital bacteria) over a 24-hour period.

# GUARANTEE & SERVICE

With our hassle-free White Glove delivery service, we place your furniture in individual rooms and take away all packaging, leaving you with furniture ready for use.

Over the past forty years we've built our business on providing the best products and service in our industry. We're proud of the strength of our products as well as the relationships we have with our customers.

## Giving you total peace of mind

Most of our furniture is guaranteed against **manufacturing faults for 7 years.**

Our superbly durable **Ryno® range comes with a lifetime guarantee.**

We pride ourselves on our aftercare service. Our support continues beyond the point of sale, going the extra mile to achieve complete customer satisfaction.

For exceptions, please see <https://uk.pineapplecontracts.com/guarantee>

# OUR NETWORK

Our growing global operation includes offices and partners around the world, ensuring that we can help customers wherever they are, whenever they need it.

# VISIT OUR SHOWROOM

Our UK showroom in Kent provides the opportunity to experience the comfort of our products for yourself as well as making side-by-side comparisons to ensure you make the right choice.

Feel free to bring your clients along too, have a coffee and look through materials and product options before making a decision.

## Book your visit

UK showroom in Kent  
**Call +44 (0) 1622 237830 to book your visit.**

Can't make it?

If you can't make it to see us, we can always bring furniture samples to you.  
 Our demonstration models are an ideal way to help our customers make the right choice when it comes to furniture.

# THE FULL PACKAGE

Our extensive furniture range can be used to furnish all areas of a modern facility, helping to create a safer environment for patients, staff and visitors.

**Dining area**  
Stress can be heightened during mealtimes, so our furniture is designed to minimise conflict as well as withstand outbreaks of challenging behaviour. Our Ryno® activity table weighs 140kg to prevent overturning and preserve safety.

**Quiet lounge**  
Modular reinforced seating like our Snug Plus range can help to encourage social inclusion, while soft foam shapes and cosy beanbags provide a safe space for quiet reflection.

**Waiting area**  
Space efficient, easy-to-clean designs like Skye provide comfort for visitors while enabling staff to fulfil their duties more efficiently.

**Bedroom**  
Bedrooms are private spaces where round-the-clock observation may not be practical. Our safest bedroom ranges are designed to minimise ligature risks and reduce opportunities for damage.

**Outdoor space**  
Products in our Ryno® range are totally water-resistant and UV stabilised, and are heavily weighted as standard, making them a safe and durable option for outdoor spaces.

**TV lounge**  
Lockable wall and floor mounted TV cabinets with durable polycarbonate screens offer protection for equipment, and there is extensive choice in our broad range of sofas.

**RYNO<sup>®</sup>**

**COMBINING**

**EXTRAORDINARY**

**RESILIENCE WITH**

**ORGANIC STYLING**

# RYNO®

Ryno products are made to the highest standards and designed to withstand the harshest treatment, representing value for money over their lifetime.

All have been created with safety in mind, with all their characteristics resulting in safer settings for users and staff.

### Weatherproof

Ryno products are totally water-resistant and UV stabilised, making them suitable for indoor and outdoor use in all weather.

### Fixing

Using our unique hidden fastening methods, Ryno products can be secured to floors and/or walls, deterring weaponisation and reducing opportunities for concealment. left

### Lifetime guarantee

All Ryno products are covered by a lifetime guarantee against manufacturing faults, providing additional peace of mind. right

### Non-flammable

The entire Ryno range is fire-retardant, adding an extra level of safety - essential in challenging environments.

### Strength

Their one-piece construction enables Ryno products to withstand extreme treatment, with smooth curves distributing impact evenly throughout the product.

### Hygienic

Ryno products' water-resistant nature means they can easily be wiped clean, ready to be used again.

### Heavyweight

Ryno products can be heavily weighted to make them near-impossible to pick up or throw, to create safer environments.

# RYNO<sup>®</sup> MATERIAL

Ryno products are manufactured from a unique polyethylene compound developed to create safe, durable products.

 <p>UV stabilised</p>	<p>A UV stabilising additive protects Ryno products against the damaging effects of the sun's rays, limiting colour fading and brittleness when used for extended periods outdoors.</p>
 <p>Flame-retardant</p>	<p>Ryno products are UL94 HB compliant due to the inherently flame-retardant properties of our polymer.</p>
 <p>100% recyclable</p>	<p>Made from 100% recyclable content, when the products reach the end of their useful life, they can be returned to us, ground down into small granules and used to create new pieces of furniture, reducing their impact on the environment.</p>

# RYNO<sup>®</sup> COLOURS

A palette of therapeutic hues.

Colour can play a key role in harmonising healthcare environments, which is why we enlisted the help of SeymourPowell, one of the world's leading design and innovation consultancies, to assist us in selecting a palette of therapeutic hues.

Whether the aim is to create a soothing and reassuring space or provide inclusive stimulation, our unique colours can help to achieve it.

# RYNO<sup>®</sup> OCEANGREEN

Helping to keep our oceans clean

Abandoned or lost fishing equipment accounts for around 10% of the plastics that end up in our oceans.<sup>1</sup>

“Ghost nets” like these can be harmful to sea life with fish, birds, crabs and other species becoming tangled in them and attracting larger animals like dolphins and whales which can also become trapped. They can also cause damage to sea beds and coral reefs by becoming snagged and shading them from sunlight.

By collecting these nets before they reach our oceans, and using them to manufacture our products, we’re minimising the harm abandoned nets can cause to our oceans.

By using *recycled* materials to manufacture *recyclable* products, we’re creating a sustainable supply chain.

By reducing the amount of virgin material used to produce our furniture, we reduce the energy consumption by 23%.

We’re assessing all of our products for carbon reduction opportunities. The OceanGreen material offers a 16% reduction in carbon emissions.

## DE-ESCALATION COUCH

# JAK

In situations where a patient is in severe distress and initial verbal de-escalation techniques have proven ineffective, physical intervention may be used as a last resort to prevent the patient causing harm to themselves and others.

During physical intervention staff will aim to restrict the patient's movements using the minimum force required, maintaining patient dignity. These interventions can be physically demanding, presenting risk of injury.

Through live service evaluations with clinical professionals, every angle of this couch has been optimised to support safer de-escalation practices for patients and staff alike.

### ANGLED DESIGN

- Outer seats angled at 33° to allow closer patient engagement, aiding verbal de-escalation.
- Tapered footwell aides staff in safe de-escalation practices.

### LOWERED CENTRAL SEAT

- Helps to control lateral movement.
- Gives staff superior leg control.

### UPRIGHT SEATING POSITION

- Preserves patient dignity.
- Supports staff in de-escalation processes.

Evidence-based design providing support when it's needed most.

Beneficial for all levels of intervention.

Designed and developed in association with:

Andy Johnston Associates

Andy Johnston is a Clinical Director and independent mental health consultant with over 32 years of experience in mental health services including conflict resolution and physical intervention.

*"Staff body positions are supported throughout a seated intervention - great to see such a design"*

Physical intervention specialist

**Boden donut beanbag**  
1BODONUT1-100  
650H | 1350Ø (mm)  
Weight: 27kg

*Filling made from 100% recycled content*

KEY FEATURES	OPTIONS	
→ Double-stitched seams and non-accessible zips prevent tampering	→ Wide choice of water-resistant upholstery (we recommend a dark coloured wipe-clean vinyl)	
→ Flame retardant filling gives the beanbags their shape and comfort (made from 100% recycled content)		
→ Internal seam lining provides an extra layer of protection		

# EVIDENCE-BASED DESIGN

As part of the development process of the Boden Rocker, we trialled a prototype at two mental health hospitals (Adult and CAMHS) and sought feedback from healthcare professionals.

This valuable feedback helped our design team to refine the design to achieve maximum benefit for the users and caregivers.

## ✓ DESIGNED IN ASSOCIATION WITH HDR

The Boden Rocker was designed in association with Jason Beshore, Health Principal at HDR Architecture.

As part of his work designing behavioural health spaces, he noted patients self-soothing by rocking back and forth on the floor rather than using available rocking chairs. After talking to care providers and conducting research to learn more, Jason presented us with a concept, and our product design team set to work bringing this concept into reality, creating a prototype which was trialled in a live environment.

## ✓ TACTILE, PROPRIOCEPTIVE AND VESTIBULAR INPUTS

The Rocker is designed to provide gentle, controllable vestibular stimulation, helping to comfort and calm those in crisis.

The shape, size and softness of the product also offer tactile (touch) and proprioceptive (sense of body positioning) inputs which provide a supportive feeling of reassuring wrap-around contact.

These attributes are particularly important in mental health settings where staff are unable to provide physical contact like a reassuring hug to those in crisis.

## ✓ A SUSTAINABLE CHOICE

As part of the manufacturing process of our other seating products, small pieces of waste foam are generated. We use this waste foam as fillings for our beanbags, reducing our CO2 emissions.

The plastic base of the Rocker is made from 100% recycled polyethylene.

The Boden Rocker is made from 64% recycled content, which means the carbon footprint of the product is reduced from 173kg to 47kg of CO<sub>2</sub> – a 72% decrease.

*“The patient’s seclusion/restraint episodes decreased in frequency by nearly 75%.  
When the patient did have episodes of aggression or self-injury, they were significantly shorter and less intense overall”*

NIGHTINGALE AWARDS 2023 **Gold Award**

NIGHTINGALE AWARDS 2023 **Innovation Award**

## KEY FEATURES

- Gentle, controllable vestibular stimulation provides comfort and calm
- Donut shape provides a reassuring feeling of wrap-around contact
- Seating position close to the ground provides a feeling of safety
- Raised back offers head and neck support

- Large size and weight prevents the beanbag being picked up
- Recycled plastic base which is textured to provide grip and prevent the product moving along the floor
- Made from 64% recycled content, contributing to a 72% reduction in CO2 emissions

## OPTIONS

- Available in a wide range of water-resistant upholstery

## KEY FEATURES

- 28mm thick tops and 18mm hickory melamine-faced carcass
- Designed without doors for safety and durability
- Half-depth shelf with groove instead of clothes rail to minimise ligature risks

- Fixed shelves with reinforcement panels to prevent misuse
- Security fixings as standard

## OPTIONS

- Sloping top to prevent climbing and allow thorough inspection

*Designed without doors and drawers to further reduce ligature risks*

# ACUMEN

Acumen has been specially designed for challenging environments with reduced-ligature features and minimised concealment opportunities.

Enclosed underside eliminates concealment opportunities. *below*

Half-depth shelf with groove instead of clothes rail to minimise ligature risks. *above*

Inset handles reduce ligature risks. *above*

Continuous hinges minimise ligature risks. *right*

Curved door tops and optional sloping top prevent climbing and allow inspection. *right*

Drawer fronts are inset into the cabinet for added durability. *left*

Strong cam and dowel construction with glued wooden dowels for added durability.

Security fixings to deter tampering.

Heavy-duty drawer runners with 45kg load carrying capacity.

10mm thick bottom creates added rigidity.

## KEY FEATURES

- 28mm side panels for strength with solid reinforced under rails
- Enclosed base to minimise concealment opportunities
- Heavyweight to deter misuse
- Smooth rounded corners for safety

## OPTIONS

→ Available in Hickory and Walnut finish

# SOVIE

This range has been designed to provide an ideal safety solution for beds in challenging environments.

**Strength**  
Internal support ribs provide extra strength and durability.

**Water resistance**  
Sovie's one-piece mattress platform has no joints or crevices through which liquid can permeate, preserving hygiene and infection control levels.

## DURA-TEC material

The Sovie bed is coated in DURA-TEC – a tough plastic which is commonly found in aircraft interiors. Kydex is an extremely durable finish which withstands impact and is resistant to tough chemical cleaners.

### Flame retardant

DURA-TEC has flame retardant properties:

- Achieves Class A rating (the highest) for ASTM E-84\* surface burning characteristics of building materials
- Is self extinguishing in the absence of an external flame

### Anti-bacterial

DURA-TEC resists bacterial and fungal development:

- It provides no source of nutrients (unlike some other plastics)
- Passed ASTM G-21\* (bacteria) and ASTM G-22\* (fungus) by supporting no bacterial or fungal growth

### Chemically resistant

DURA-TEC remains unaffected by some of the harshest chemicals:

- 70% Nitric acid
- 30% Sulphuric acid
- 10% Hydrochloric acid
- Ammonia
- 3% Hydrogen

**Installation**  
Beds can be securely fixed to the floor, using infill panels to minimise concealment opportunities when positioned against a wall.

# SOVIE BEDS

Static weight tested to  500KG

**Sovie single 3' box bed**

## OPTIONS

- Available with integral pillow
- Available fire retardant to BS7177 source 5 and BS7177 source 7

Scorpio mattress for Ryno bed available - see page 57

# SCORPIO COLLAPSIBLE

Versatile design serves multiple functions including making it usable for soft seating.

The patented design of our Scorpio collapsible mattress (No.GB2572141) prevents obscuring of vision panels as it ‘collapses’ when stood on end.

	<p>Available fire-retardant to BS7177 Ignition Source 5 or Ignition Source 7.</p>		<p>An optional security under layer makes damage more noticeable during staff inspection.</p>		<p>Unlike separate pillows, the optional integral pillow cannot be used to as a weapon or to block plumbing.</p>

# NEXT STEPS

NOW IT'S TIME TO

MAKE ANY FABRIC

CHOICES AND PLACE

YOUR ORDER

# UPHOLSTERY

We provide an extensive range of water-resistant fabrics and vinyls to ensure that you will find the right finish for your furniture.

## Fabrics

A durable option which combines the comfort of soft fabric with practical water-resistant properties. Please be aware, these fabrics are more susceptible to stains than vinyl.

Call us to request your fabric swatch cards to see the full choice available.

## Vinyls

Hard wearing and water-resistant, leather-effect vinyls can be wiped clean which makes them a hygienic and practical option for healthcare environments.

Call us to request your fabric swatch cards to see the full choice available.

Some of our ranges are available using dual fabrics to add multiple textures and colours to one item of furniture.

**Please note:** Cracking and stickiness on vinyl fabrics are known issues to fabric manufacturers. As furniture manufacturers, Pineapple cannot accept responsibility.
