

FITTED FURNITURE SOLUTIONS

For Mental Health
Bedrooms & Living Spaces

Pineapple

50 years of experience transforming mental health environments

Experts in reducing risk

For the past 50 years we have been helping to transform challenging environments with style and quality, with total commitment to safety and durability.

Our products are strength and stability tested to British Standards for severe non-domestic use and are fire retardant to Crib Source 5 minimum (Crib Source 7 available for certain products) to give you peace of mind.

Our human-centred design solutions help to create safer, longer lasting furniture for service users and staff alike.

Service you can depend on

- 7 year guarantee against manufacturing faults
- Free demonstration furniture
- Free spaceplanning design service
- Free showroom tours

VISIT OUR SHOWROOMS

Our showrooms at our Headquarters in Kent give you the opportunity to experience the comfort and quality for yourself. Contact us to arrange your appointment.

OUR APPROACH

Our collaborative approach helps us understand your specific needs, and our design and manufacturing capabilities allow us to create the perfect solution.

Your **dedicated project manager** will oversee each stage of the process, keeping the installation on track and giving you a clear point of communication.

Compliance

- Our professional team of installers are CSCS certified
- Our experienced supervisors are SSSTS certified
- PASMA certified employees for working on mobile access towers

SELECTING THE BEST SOLUTION FOR YOUR NEEDS:

Off the shelf furniture

Choose from a wide range of products in our standard furniture ranges

Custom made furniture

Bespoke storage solutions, designed to your exact specification finished in a material of your choice (subject to order quantities)

Both solutions are installed by our qualified installation teams who are experienced in working in high-risk environments. Products are secured to the wall and/or floor for safety and sealed with anti-pick silicone for a water-resistant, anti-tamper finish.

REDUCING RISK

Planning and preparation

“By paying close attention to potential safety risks during the survey phase, we can ensure safety is built in to the final product.”

HEAD OF PROJECTS & INSTALLATIONS

Survey

During the survey stage, we take critical measurements of the space, listen to your needs and gaining a thorough understanding of the project aims.

At this stage, we can identify potential safety risks which may influence our design approach.

Once the key requirements are established, our design engineers set to work on a solution.

Design

For off-the-shelf solutions which use our existing product range, our design engineers can create fully dimensioned spaceplans along with 3D imagery to help visualise your space.

For custom solutions, our design engineers create made-to-measure furniture to help you make the most of your space. Like off-the-shelf solutions, fully dimensioned spaceplans and 3D imagery are provided.

REDUCING RISK

Installation

“We understand the importance of delivering projects on time, to strict specifications which are designed to protect service users and staff”

HEAD OF PROJECTS & INSTALLATIONS

Installation

After completing pre-installation preparations including risk assessments, our experienced installation team attends site to complete the installation.

In order to maintain consistent, high-quality installations, we only use our own installation teams who are experienced in working in mental health environments.

Aftercare

After ensuring you are totally satisfied with the installation, we leave the site clean and tidy, ready for residents to move in.

Fitted furniture installations are covered by our product guarantee which protects against manufacturing faults for 7 years.

CLIENTS

A small selection of clients who trust Pineapple to help them create safe and dependable mental health environments

“ The team listened to our needs and were even able to provide input into what would they believed our service would need.

The products that have been provided have managed to capture the balance of safety and comfort...I would recommend using Pineapple products to any other inpatient mental health services ”

CAMHS PICU Ward Manager

“ We worked closely with Pineapple on our large redevelopment project, selecting many products from their bedroom, dining and lounge ranges to match our specific requirements.

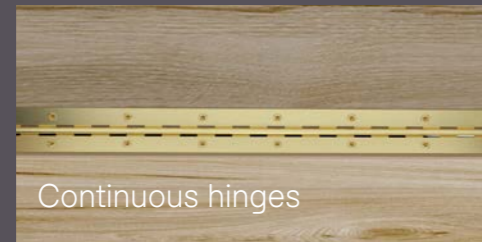

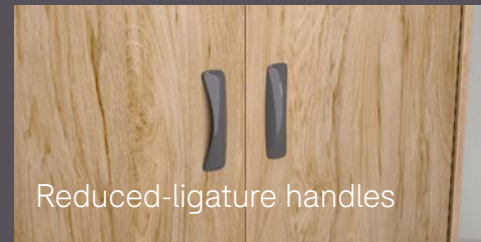

The Pineapple installation team were extremely helpful, creating bespoke cabinetry, headboards and fitted furniture to our specifications. We are very pleased with the outcome and would certainly choose to work with Pineapple again on future projects. ”

FF&E Project Manager, Secure School

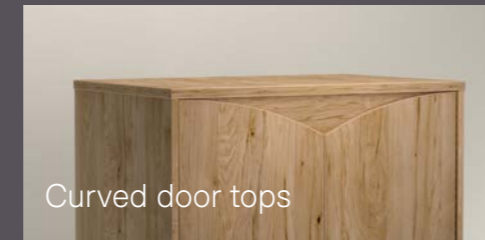

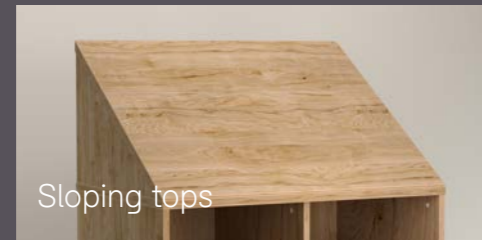

SPECIALIST SOLUTIONS

For high risk environments

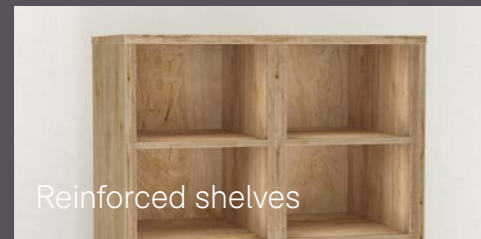

Ligature risk reduction

We consider potential ligature risks down to every detail. From innovative storage solutions to reduced-ligature handles and continuous hinges, our products are designed to be as safe as possible.

Damage resistance

We understand that products in mental health environments can be subjected to harsh treatment. Our shelves feature additional reinforcement, and drawers are non-removable as standard.

Concealment Prevention

Where furniture is fitted to the wall, we make allowances for skirting board and pipework, minimising potential concealment opportunities.

Infection Control

All products are finished with a tamper-resistant sealant which creates an easy-to-clean, water-resistant seal and also helps to minimise ligature risks.

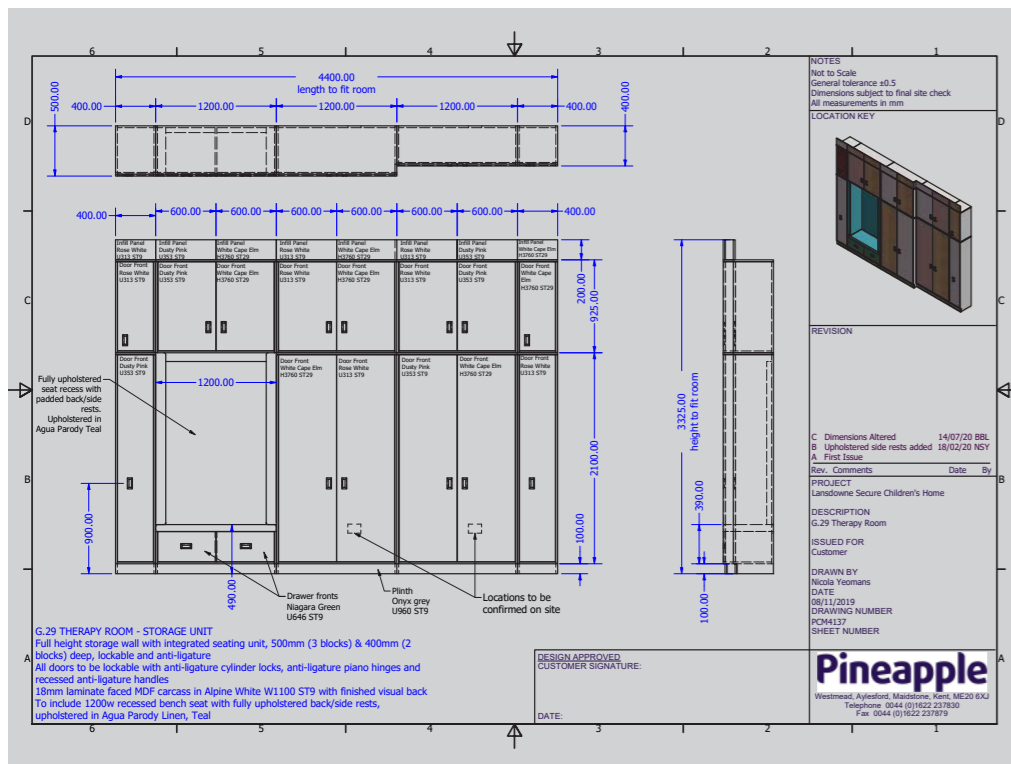

Tamper Resistance

Security fixings are used as standard to prevent tampering and improve safety for patients and staff.

BRINGING YOUR IDEAS

Whether you choose standard product or custom designs, the furniture is secured with anti-tamper fixings and finished with anti-pick silicone, leaving you with a safe and hygienic solution.

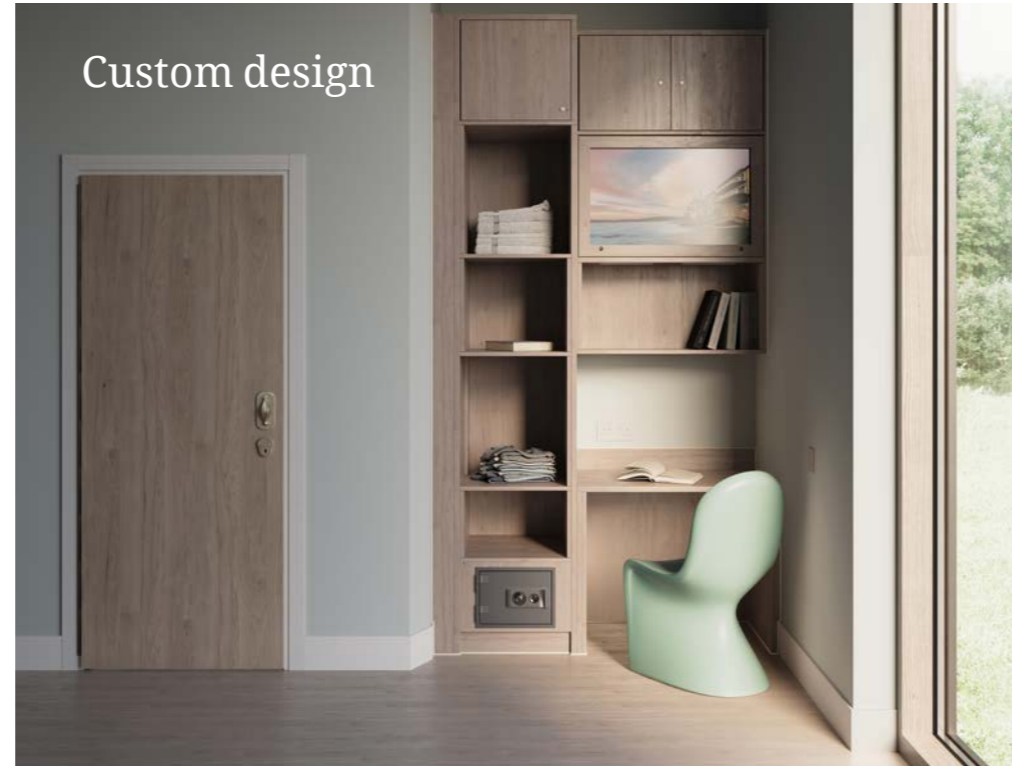

HARBY

Made from 25mm thick tops and 18mm side panels, Harby is a durable option for challenging environments.

As standard, drawer boxes are constructed with 18mm backs, sides and bottoms and double-thickness fronts which results in an extremely strong drawer.

Whether you choose standard product or custom designs, the furniture is secured with anti-tamper fixings and finished with anti-pick silicone, leaving you with a safe and hygienic solution.

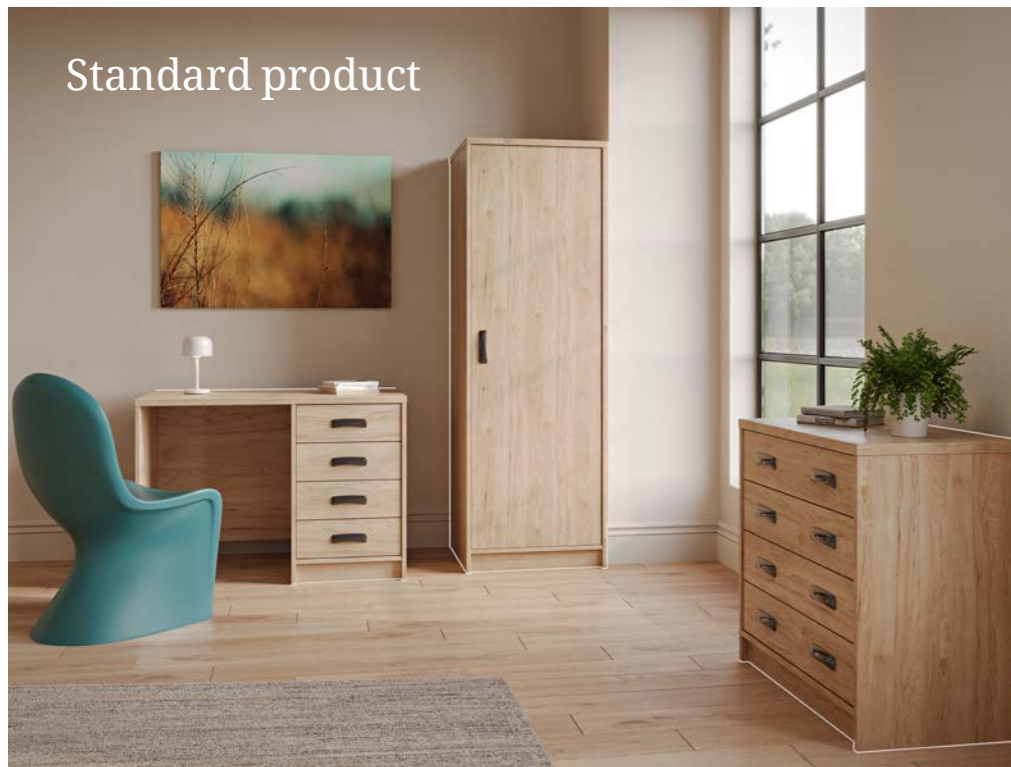

Custom design

Providing easy access to good quality outdoor space was one of this building's fundamental design principles.

CASE STUDY

St Ann's Hospital

Designed in collaboration with service users and clinicians, Blossom Court is an inpatient adult mental health service provided by Barnet, Enfield and Haringey Mental Health NHS Trust.

Working with Medical Architecture, our design engineers created bespoke fitted furniture in the bedrooms, installing them securely into a recessed portion of the wall.

The cabinetry was designed without doors to minimise ligature risks. All shelves and desk tops were reinforced with support panels between shelves, fixing them securely in place and creating an extremely strong and damage-resistant solution.

"We selected Pineapple because of their excellent knowledge of the healthcare sector and their range of products suitable for high-risk environments"

ACUMEN

Made from 25mm thick tops and 18mm side panels, Acumen is a durable option for challenging environments with rounded corners and reduced-ligature features for additional protection.

As standard, drawer boxes are constructed with 18mm backs, sides and bottoms and double-thickness fronts which results in an extremely strong drawer.

Whether you choose standard product or custom designs, the furniture is secured with anti-tamper fixings and finished with anti-pick silicone, leaving you with a safe and hygienic solution.

CASE STUDY

Eden House

We supplied a variety of off-the-shelf and bespoke items from our Acumen and Sovie bedroom ranges for this newly refurbished NHS mental health facility.

With the customer requiring additional storage, we developed a bespoke version of our popular Sovie bed, with securely lockable drawers housed within the angled sides of the bed.

The room configurations required careful consideration to provide staff with good line of sight from the doors in order to protect people in their care.

The furniture items were secured to the walls using specialist concrete fixings to provide a strong and durable connection before being hygienically sealed with anti-pick mastic in a soft linen colour.

Seal chairs were specified in bedrooms, providing a soft and safe seating option. Unlike traditional upholstery, Seal products feature no stitching or seams, giving them a water-resistant surface which minimises concealment opportunities.

Elsewhere in communal spaces, Purl Plus chairs were specified in a selection of bright and vibrant water-resistant vinyl upholstery. Purl's chrome feet are designed to stand up to the rigours of regular cleaning routines, where wooden feet may degrade over time.

RYNO®

Made from rotationally moulded polyethylene, our innovative Ryno range is 100% water-resistant and extremely resistant to damage.

Ryno's single piece construction means there are no joints or weak points where damage may occur.

Ryno products can be thoroughly cleaned over long periods with no detriment to the surface.

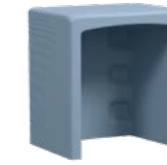

RYNO

Available in 13 versatile colours

Ryno Chest with 3 compartments
1RYOC
735H | 698W | 507D (mm)

Weight: 110kg

Ryno 2'6'' Cube bed
1RYCB-FF
380H | 2035L | 815W (mm)
Weight: 50kg

With a variety of room configurations, furniture placement was carefully considered to minimise 'blind spots' and aid inspection.

CASE STUDY

Chase Farm Hospital

Cumbria Villa is a secure mental health unit situated at Chase Farm Hospital in North London, managed by Barnet, Enfield & Haringey Mental Health Trust. A recent development and extension to the hospital site saw Cumbria Villa further enhance its services to provide a 15-bed ward for patients requiring specialised psychiatric care within a secure mental health environment.

Products from our Ryno® range were chosen for the bedrooms. With their open-fronted design and carefully rounded shapes, Ryno products are designed to minimise ligature risks which makes them a popular choice for private spaces, such as bedrooms where round-the-clock observation isn't always possible.

Photography © Bruno Rondinelli

“ The range is a great upgrade to the previous timber ranges available. It is bright, robust, cleanable and is available in a good range of colours, enabling us to choose a modern calming therapeutic environment ”

LOUNGE FURNITURE

With lockable doors and 8mm polycarbonate screens as well as reduced-ligature features, security and safety are the top priorities for our lounge furniture ranges.

Whether you choose standard product or custom designs, the furniture is secured with anti-tamper fixings and finished with anti-pick silicone, leaving you with a safe and hygienic solution.
