

RYNO[®]

Modular
Seating

Pineapple

Flexibility and adaptability are key design principles for healthcare spaces. Over time, care provision can evolve, and patient needs can change, leading to a shift in the way spaces are used.

Furniture that can be easily reconfigured or repurposed allows healthcare facilities to adjust layouts quickly and cost-effectively without requiring significant structural changes.

Whether you're creating a quiet corner to minimise distraction, or to encourage communication and sharing, the flexibility of the Ryno® modular range can help.

With a variety of dynamic configurations, this stylish range can be securely connected together with an optional linking bracket.

Moulded from a single piece of material, each modular item is designed to minimise ligature risks, while providing no concealment opportunities.

Additional weight can be added to each product to prevent it from being picked up, creating safer environments for patients and staff. 100% waterproof and UV-stabilised, the range is suitable for indoor and outdoor use, and is available in 15 versatile colours.

RYNO[®] MODULAR

Seat static weight tested to  500KG

-  Lifetime guarantee
-  Weighted to deter misuse
-  Fire retardant
-  40% recycled
100% recyclable
-  Weatherproof
