

UK Registered Design No. 601500 & 6201501

Heavy weighted

FR fabrics available

KEY FEATURES

- Combines sumptuous comfort with durable standard reinforcement
- Versatile modular design allows individual pieces to be used alone or combined to create configurations suited to the space
- Promotes social inclusion
- No-arm design supports de-escalation
- Low overall height provides clearer sightlines for staff
- Soft, deep foam provides excellent comfort
- Black plastic feet help protect flooring and facilitate ease of movement

MATERIAL/FABRICATION

The **Snug modular seating** range combines a soft, comfortable upholstered construction with a versatile modular design suited to shared and communal spaces.

The interior is manufactured using fire-retardant CMHR (Combustion Modified High Resilience) foam, providing a supportive and comfortable seating surface while helping to meet the requirements of demanding environments.

The seat incorporates plywood reinforcement for additional durability, while the enclosed construction helps create a robust seating solution suitable for regular use.

TESTING STANDARDS

- Strength & stability tested to **BS EN 16139:2013 lvl 2 - Seat & back durability tested for 200,000 cycles.**
- Note:** Not applicable to Snug chairs with arms
- Interior manufactured using **fire-retardant CMHR foam**
- **BS 5852:2006, Sources 0,1 & 5** (subject to fabric choice)
- **DIN 66084:2021-02** (crib 7 fabrics only)
- UK Registered Design No. **6201500 & 6201501**

COLOUR/FINISH

- Black plastic feet as standard ●
