Heavy weighted

FR fabrics available

KEY FEATURES

- Combines sumptuous comfort with enhanced reinforcement
- Zero-depth seams help prevent concealment
- Versatile modular design allows individual pieces to be used alone or combined to create configurations suited to the space
- Plywood reinforcement, including a fully enclosed base
- No-arm design supports de-escalation
- Low overall height provides clearer sightlines for staff
- Black plastic feet help protect flooring and facilitate ease of movement
- Seat static weight tested to 500kg

MATERIAL/FABRICATION

The **Snug Plus** range combines the comfort and modular versatility of the standard Snug range with additional reinforcement for increased strength, durability and security in more challenging environments.

The interior is manufactured using fire-retardant CMHR (Combustion Modified High Resilience) foam, with soft, deep cushioning for excellent comfort.

Additional reinforcement is incorporated throughout the seat, back and underside, while a fully enclosed plywood-reinforced base helps improve durability and reduce concealment opportunities.

Zero-depth seams further minimise concealment opportunities, while security-focused construction details help reduce the risk of tampering and misuse..

TESTING STANDARDS

- Strength & stability tested to **BS EN 16139:2013 lvl 2** - Seat & back durability tested for **200,000 cycles**.
Note: Not applicable to Snug Plus chairs with arms
- Interior manufactured using **fire-retardant CMHR foam**
- **BS 5852:2006, Sources 0,1 & 5** (subject to fabric choice)
- **DIN 66084:2021-02** (crib 7 fabrics only)
- Seat static weight tested to **500kg**
- UK Registered Design No. **6201500 & 6201501**
