

MAGNA 2.0 SOFA BED

1MGA2-200
768H | 1540W | 858D (mm)
Seat Height: 452mm
Magna mattress size: 1780L | 950W | 75D (mm)
Weight: 61kg

KEY FEATURES

- Easily transforms into extra sleeping or lounging space
- Strong contract mechanism
- Seat pad can be removed and placed behind as a headboard
- Supplied with a speciality designed FR Crib 5 Magna Mattress
- Strength and stability tested for severe contact use
- Seat static internal load tested to 500kg
- Recommended for low-risk environments

MATERIAL/FABRICATION

Frame:
The sofa frame is constructed from a combination of plywood, chipboard, and pinewood, with four solid birchwood feet. A black fire-resistant lining fabric is applied to the underside and anti-tamper security fixings are used throughout.

A full base board provides additional support for the seat cushion (which is also removeable) and protects the internal mechanism. This board is reinforced to withstand up to 500kg. The sofa features a single CMHR foam cushion, and the sofa is upholstered in one colour with a single topstitch finish.

Sofa Bed Mechanism:
The sofa incorporates a timber-slatted, three-fold sofa bed mechanism, accessible by removing the seat cushion and base board. The mechanism is constructed from thick steel tubing with high-quality finishes, offering exceptional durability and comfort.

Magna Mattress:
Supplied as standard with our Magna mattress featuring a PU (polyurethane) coating, like our popular Polar mattress range. Side vents allow air to escape when compressed, while the hydrophobic material prevents moisture ingress. The mattress is heat-sealed for further moisture resistance, making it hygienic, easy to clean, and quick drying for repeated use.

Due to potential ligature points and concealment areas, this product is recommended for low-risk environments only.

TEST STANDARDS

- EN 16139:2013 Test Level 2 and EN1725:2023 (Contract Level) (Excluding Test 10 (Durability of Sofa Bed Action)
- Magna mattress complies to BS7177:2008 Crib Source 5 for medium hazard use
- Seat static internal load test to 500kg/1102lbs
- Pressure Mapping - Internal Test
- Flammability: BS7177:2008 + A1:2011 - Medium Hazard | BS6807:2006 - Ignition Source Crib 5, Clause 9

Weight: 61kg

ASSEMBLY/ INSTALLATION/FITTING

No fitting required, arrives assembled and ready to use

DELIVERY

Lead time is 9 weeks

MAINTENANCE

Please visit the care guidance section on our website for more information. Alternatively, our friendly sales team is available to assist with any further queries. If the mechanism becomes damaged, it can be easily replaced and is accessible via the base.

Care guidance for Magna Mattress:

Wipe with mild detergent. Wash or dry-clean using detergent up to 40°C/104°F. For disinfection use sodium hypochlorite up to concentrations of 10,000 parts per million of active chlorine. If the fabric has been heavily soiled a chlorine solution of up to 10,000 ppm can be used. Frequent or prolonged use of 1% chlorine solution (10,000 ppm) may reduce the useful life of the fabric. Avoid using biological or phenolic-based cleaners. Wash and dry completely before storage.

For maximum longevity we recommend turning frequently (both on long and short sides)

WARRANTY

Magna Mattress: Supplied with a **1-year guarantee** against manufacturing defects.

Sofa Bed Mechanism: Covered by a **3-year guarantee**, applicable only to faults arising from production defects. Damage resulting from misuse is not covered.

Magna 2.0 Sofa Frame: Backed by a **7-year guarantee** against all manufacturing faults. (Excludes fabric and vinyl upholstery)
