

INTERNAL TESTS

Ohio modular seating

Sample: Ohio 2-seater
 Date: 29/01/2026
 Tester #1: Jonathon Drummond
 Tester #2: Lizzie Waters
 Reason for test: Strength & Stability Tests
 (PIN-001.2:2005)

Test Type	Photos	Comments (including pass/fail)
Static Load	  	<p>A load of 506kg was applied with no issues observed, and the sofa remained stable throughout testing. Minor scratches were noted to the plinth after testing, with no impact on performance.</p> <p>-Pass</p>

Summary

During load testing, the sofa successfully supported 500kg with no stability or structural issues observed. The frame remained secure and level throughout, with no signs of movement, stress, or joint failure, confirming the unit's strength and durability under high-load conditions. Post-test inspection showed all structural components intact. Minor cosmetic damage was noted to the plinth base due to ground contact; however, this did not affect the overall performance or stability of the sofa.
