

FURNITURE FOR MENTAL HEALTH ENVIRONMENTS

Designed for
peace of mind

Pineapple

IT ALL BEGAN IN

Our founder, William Hathorn, started our company in a workshop in London, England. Originally trading as Pine Productions, based on the popular wood we used to build our furniture, we crafted strong, durable products using traditional carpentry methods. But as our business grew and we began to provide furniture in a variety of materials for the healthcare market, the name no longer fitted. So, with a nod to our beginnings, we took a bold step and became Pineapple.

As our reputation for designing for demanding environments grew, so did demand for our products and we soon expanded into new premises, doubling our production capacity. We started creating technically advanced furniture for secure settings like mental health units and prisons, as well as lower risk spaces like hospitals, healthcare and education facilities.

1975

TODAY

50 YEARS OF INNOVATION

We continue to create innovative furniture to deliver real-life solutions for our customers and, from initial concept right through to manufacture and delivery, we have full control of the process. All of our designs are either manufactured by us or by our carefully chosen partners who produce our furniture under license to meet our precise specification and design.

While our business is now international and our vision more ambitious than ever, we're still a family business at heart. Our work ethic and attention to detail is exactly the same as when we started in 1975.

THE PINEAPPLE PROCESS

We listen

01

We listen more widely and more deeply to our customers' unique set of challenges; they might be safety concerns, maintenance issues or limited space. With forty years of experience under our belts, we're good at listening and know the right questions to ask.

02

understand

Drawing on our extensive knowledge gained over the last 50 years, we identify solutions that fit each brief. Then we define exactly what your furniture needs to deliver for your environment, taking physical, functional and emotional requirements into account.

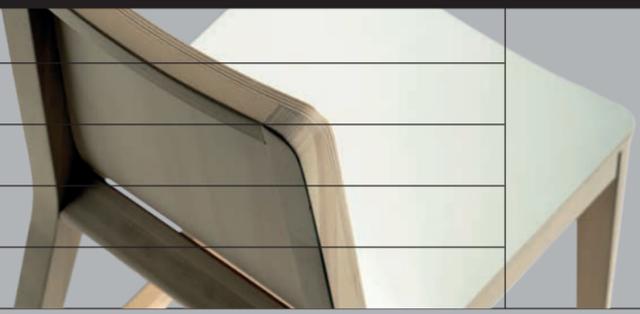

03

match

Now we understand your environment and precise needs, we can match you with the right products that will solve them. With hundreds of pieces to choose from, there is usually a solution that fits but if there isn't, we'll work with you to create one.

04

We deliver mindfully designed furniture that is exactly fit for purpose. We continue to learn from each new project, building the knowledge we gain into our new and existing product ranges to make them safer than ever.

This vibrant campus is designed to be a safe, therapeutic space for young people on juvenile probation.

RADIUS CAMPUS

RADIUS is a non-profit organisation for young people on juvenile probation which aims to strengthen family and community relationships.

The campus provides 24 beds for youths aged between 12 and 18 years old, offering mental health and substance abuse treatment as well as building family support plans for their transition into the community.

In the vibrant community space, Rock tables and chairs provide space to work and play. The frames are made from solid Birch, cross-braced for strength, and the

table tops and seats are constructed from plywood, with a durable laminate surface.

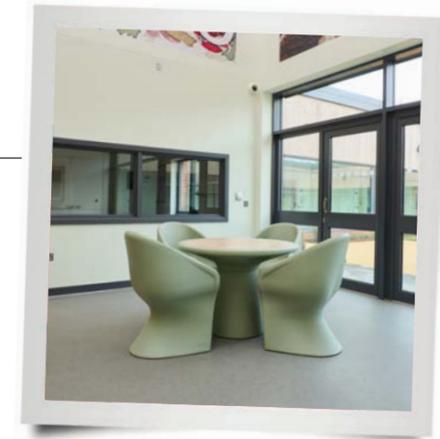

Snug Plus modular sofas provide a comfortable place for residents to relax together in the TV lounge. Snug's reinforced construction ensures they are strong enough to withstand the rigours of challenging environments.

In the bedrooms, Harby Plus Open cabinetry provides safe and durable storage, with reinforced shelves and reduced-ligature design features as standard.

Creating a purpose-built, therapeutic environment for mental health care

THE RIVERS CENTRE

The Rivers Centre at Hellesdon Hospital in Norwich is a state-of-the-art mental health facility, thoughtfully designed to provide a safe, supportive, and modern space for service users in Norfolk and Suffolk.

One of the main challenges in mental health care is balancing safety with comfort – creating spaces that are not only secure but also feel welcoming and conducive to recovery. The Rivers Centre has achieved this by combining innovative design solutions with Pineapple’s robust, durable furniture, specifically designed for mental health settings.

Communal spaces and dining areas were thoughtfully designed to create a welcoming, comfortable and safe environment for both patients and staff. These areas were furnished with carefully selected products from our Ryno® range.

Just as the interior spaces were designed with care, a key feature of the facility is its connection to the natural environment, enhancing the therapeutic experience by ensuring that patients and staff have access to green areas where they can relax away from clinical settings. This focus on nature promotes a sense of calm, playing a vital role in service users’ recovery and overall wellbeing.

SUSTAINABILITY

From building a more circular supply chain to investing clean energy initiatives, our Sustainability department is dedicated to enacting our carbon reduction plan to help minimise our impact on the environment.

HIGHLIGHTS

New initiative launched to offset air freight emissions by investing in a carbon avoidance programme.

This initiative helped us to avoid 271 tonnes of CO₂e in 2024.

£1,997
raised on Earth day for our chosen charity WWF

New initiative launched to plant a tree for every new employee joining the team

77%
increase in Ryno recycling

29%
reduction in our transport intensity (kgCO₂e/km)

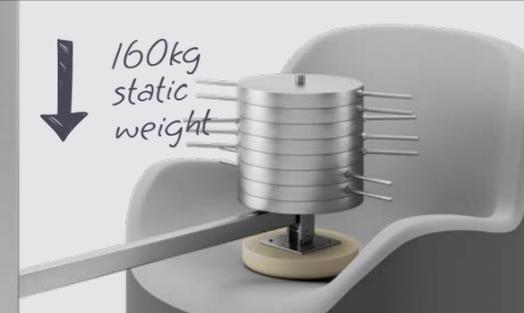

271 tonnes CO₂e
avoided via renewable energy projects

TESTING

Our products are designed for use in challenging environments like mental health hospitals and custodial facilities.

In order to maximise safety for residents and staff, we conduct extensive testing, focusing on more extreme treatment than is typically covered in common test standards.

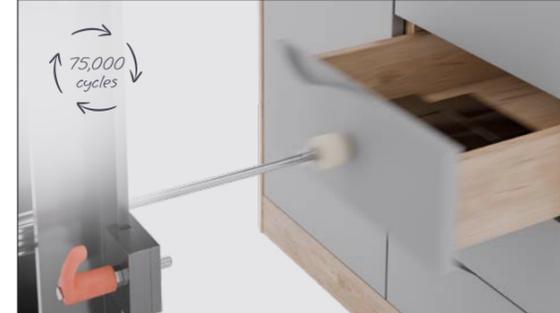

Static load

160kg static weight

During the seat and back static load test, downward force equivalent to 160kg is gradually applied to the chair's seat. This static load is intended to reflect a user weight of 110kg, who will likely impart a larger force when sitting down.

Drawers

75,000 cycles

35kg ballast

In the above test, the drawer is filled with 35kg of ballast and undergoes 75,000 cycles. If a drawer is opened and shut 5 times per day, that equates to over 40 years of use!

Hinges

30kg ballast

10 cycles

To assess the strength of door hinges, ballast is added and the door is opened and shut a number of times. In the above test, 30kg of ballast is added to the door before undergoing 10 open and close cycles.

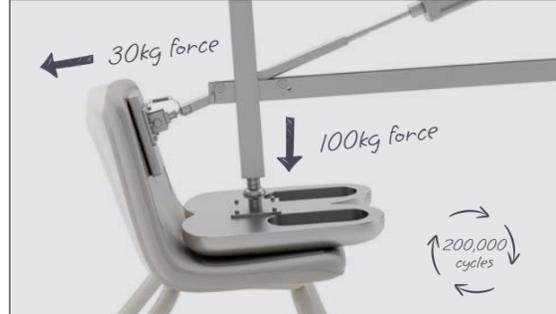

Stability

10kg force applied with doors and drawers open

The forward stability test ensures units don't tip over when doors and drawers are fully opened and an external force is applied.

Durability

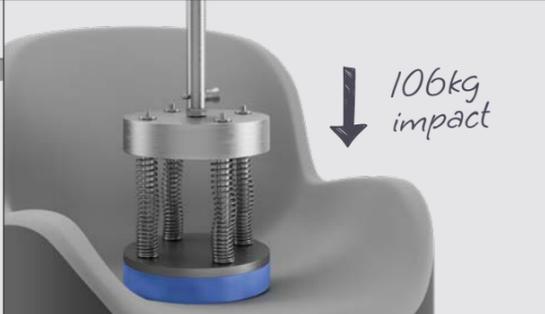

30kg force

100kg force

200,000 cycles

Durability tests include a downward force equivalent to 100kg applied to the chair's seat along with a horizontal force equivalent to 30kg pushing on the chair's back to simulate the person leaning back. This process is repeated 200,000 times to simulate long-term use.

Impact

106kg impact

Impact tests are used to assess how a piece of furniture can withstand forceful movements. In the above test, a spring-compressed head rapidly applies a force of 1040N (equivalent to 106kg) to the seat, and is repeated 200,000 times.

Armrest strength

40kg force

For products with armrests, a number of strength and durability tests are conducted. During the armrest sideways static load test, a force equivalent to 40kg is used to push the arms of a chair apart, repeating 10 times.

How we go further:

Extreme static load

TESTED TO WITHSTAND 1 TONNE

To ensure our products can withstand enthusiastic use, we choose to exceed the typical 160kg static load applied for standard tests. We have tested many of our seating ranges to withstand 1000kg (1 tonne) of static load with no signs of wear or damage.

Extreme impact

For products designed for high risk environments, we conduct sustained impact tests, striking the product with a sledge hammer for a duration of 5 minutes with approximately 240 forceful strikes.

240 strikes

INFECTION CONTROL

Ryno® products are made from our unique polymer blend which contains an anti-bacterial additive to inhibit bacterial growth. Unlike surface treatments which may wear away or become scratched, this anti-bacterial protection works throughout the product.

We apply an **anti-bacterial lacquer** to exposed wood surfaces which kills 99.9% of bacteria (including MRSA, C. diff and E. coli) within 24 hours by providing no source of nutrients which they need to survive.

Our upholstery ranges include anti-bacterial treatments which physically damage the cell walls, with tests showing a 99.99% reduction in MRSA and a 99.98% reduction in E. coli over 24hrs.

A number of our products feature a hygiene gap between the back and seat of the chair which prevents dust and dirt becoming trapped, making them easier to clean thoroughly.

Our Sovie bed ranges features a single-piece mattress tray with no joints (into which liquid may seep) and components are wrapped in a thermoplastic shell which kills 99.8% of E.coli and MRSA (most common hospital bacteria) over a 24-hour period.

GUARANTEE & SERVICE

With our hassle-free White Glove delivery service, we place your furniture in individual rooms and take away all packaging, leaving you with furniture ready for use.

Over the past forty years we've built our business on providing the best products and service in our industry. We're proud of the strength of our products as well as the relationships we have with our customers.

Giving you total peace of mind

Most of our furniture is guaranteed against **manufacturing faults for 7 years.**

Our superbly durable **Ryno® range comes with a lifetime guarantee.**

We pride ourselves on our aftercare service. Our support continues beyond the point of sale, going the extra mile to achieve complete customer satisfaction.

For exceptions, please see <https://uk.pineapplecontracts.com/guarantee>

OUR NETWORK

Our growing global operation includes offices and partners around the world, ensuring that we can help customers wherever they are, whenever they need it.

VISIT OUR SHOWROOM

Our UK showroom in Kent provides the opportunity to experience the comfort of our products for yourself as well as making side-by-side comparisons to ensure you make the right choice.

Feel free to bring your clients along too, have a coffee and look through materials and product options before making a decision.

THE FULL PACKAGE

Our extensive furniture range can be used to furnish all areas of a modern facility, helping to create a safer environment for patients, staff and visitors.

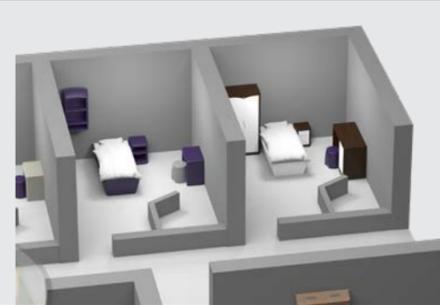

Dining area
Stress can be heightened during mealtimes, so our furniture is designed to minimise conflict as well as withstand outbreaks of challenging behaviour. Our Ryno® activity table weighs 140kg to prevent overturning and preserve safety.

Quiet lounge
Modular reinforced seating like our Snug Plus range can help to encourage social inclusion, while soft foam shapes and cosy beanbags provide a safe space for quiet reflection.

Waiting area
Space efficient, easy-to-clean designs like Skye provide comfort for visitors while enabling staff to fulfil their duties more efficiently.

Bedroom
Bedrooms are private spaces where round-the-clock observation may not be practical. Our safest bedroom ranges are designed to minimise ligature risks and reduce opportunities for damage.

Outdoor space
Products in our Ryno® range are totally water-resistant and UV stabilised, and are heavily weighted as standard, making them a safe and durable option for outdoor spaces.

TV lounge
Lockable wall and floor mounted TV cabinets with durable polycarbonate screens offer protection for equipment, and there is extensive choice in our broad range of sofas.

RYNO[®]

COMBINING

EXTRAORDINARY

RESILIENCE WITH

ORGANIC STYLING

RYNO®

Ryno products are made to the highest standards and designed to withstand the harshest treatment, representing value for money over their lifetime.

All have been created with safety in mind, with all their characteristics resulting in safer settings for users and staff.

Weatherproof

Ryno products are totally water-resistant and UV stabilised, making them suitable for indoor and outdoor use in all weather.

Fixing

Using our unique hidden fastening methods, Ryno products can be secured to floors and/or walls, deterring weaponisation and reducing opportunities for concealment. left

Lifetime guarantee

All Ryno products are covered by a lifetime guarantee against manufacturing faults, providing additional peace of mind. right

Non-flammable

The entire Ryno range is fire-retardant, adding an extra level of safety - essential in challenging environments.

Heavyweight

Ryno products can be heavily weighted to make them near-impossible to pick up or throw, to create safer environments.

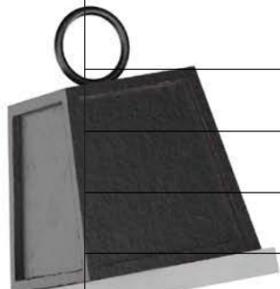

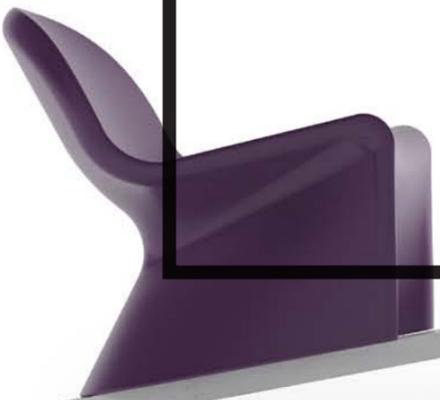

Strength

Their one-piece construction enables Ryno products to withstand extreme treatment, with smooth curves distributing impact evenly throughout the product.

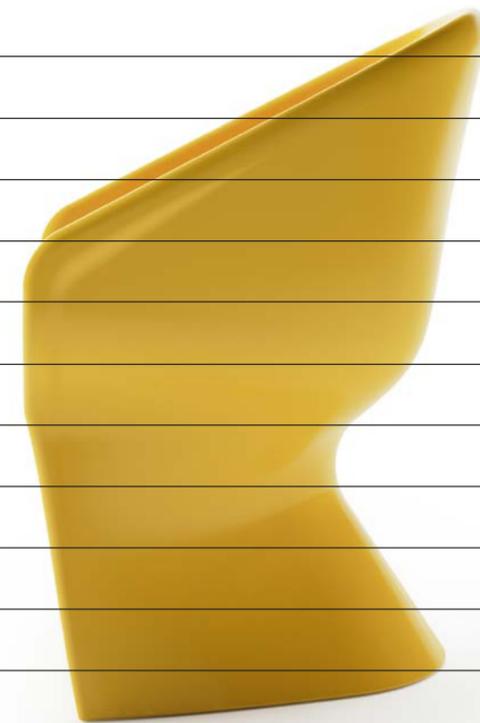

Hygienic

Ryno products' water-resistant nature means they can easily be wiped clean, ready to be used again.

RYNO[®] MATERIAL

Ryno products are manufactured from a unique polyethylene compound developed to create safe, durable products.

	
	<p>A UV stabilising additive protects Ryno products against the damaging effects of the sun's rays, limiting colour fading and brittleness when used for extended periods outdoors.</p>
	<p>Ryno products are UL94 HB compliant due to the inherently flame-retardant properties of our polymer.</p>
	<p>Made from 100% recyclable content, when the products reach the end of their useful life, they can be returned to us, ground down into small granules and used to create new pieces of furniture, reducing their impact on the environment.</p>

RYNO[®] COLOURS

A palette of therapeutic hues.

Colour can play a key role in harmonising healthcare environments, which is why we enlisted the help of SeymourPowell, one of the world's leading design and innovation consultancies, to assist us in selecting a palette of therapeutic hues.

Whether the aim is to create a soothing and reassuring space or provide inclusive stimulation, our unique colours can help to achieve it.

RYNO[®] ROCKER

Ryno Rocker
 1RZR-00
 867H | 761W | 992D (mm)
 Seat height: 450mm
 Weight: 21kg

Rocking motion provides comfort, calm and control

-  Lifetime guarantee
-  Available with added weight
-  Fire retardant
-  Made with recycled content
-  Bedbug resistant

KEY FEATURES

- Gentle rocking motion provides comfort and calm
- Sloped arms and low back designed to minimise ligature risks
- Hygienic wipe-clean surface
- Totally waterproof and UV stabilised material
- Strength and stability tested for severe contract use
- Made with recycled content, and 100% recyclable
- Drainage holes and outdoors usage is not recommended as exposure to the elements may cause surface discoloration

OPTIONS

- Weighted model (65kg)
 - Anti-concealment base plate
 - Anti-tip stopper
 - Wide range of vibrant shell colours
- Core colours
- 
- 

RYNO® 2-SEATER

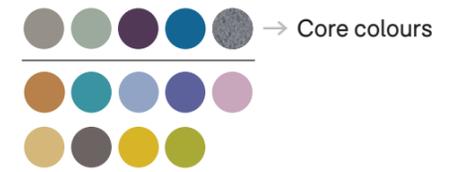

Seat static weight tested to

KEY FEATURES		OPTIONS
<ul style="list-style-type: none"> → Heavily weighted to 123kg standard to deter misuse (other weight options available) → Integrated drainage channel allows water run-off → Sloped arms and low back designed to minimise ligature risks → Ergonomically designed to give excellent comfort → Hygienic wipe-clean surface 	<ul style="list-style-type: none"> → Waterproof, UV stabilised material - suitable for outdoor use → Strength and stability tested for severe contract use <p><i>One-piece design cannot be disassembled or weaponised</i></p>	<ul style="list-style-type: none"> → Floor fixing solution → Lightweight model (35kg) → Anti-concealment base plate → Wide range of vibrant shell colours  <p>→ Core colours</p>

RYNO[®] TUB CHAIR

Seat static weight tested to  450KG

Ryno tub chair
 1RYU-02
 805H | 670W | 680D (mm)
 Seat height: 430mm
 Weight: 82kg

 Lifetime guarantee	 Weighted to deter misuse
 Fire retardant	 100% LDPE
 Weatherproof	 Floor fixed option

KEY FEATURES

- Heavily weighted to 82kg to deter mishandling (other weight options available)
- Ergonomically designed armrests to assist standing and sitting
- Hygienic wipe-clean material

- Waterproof, UV stabilised material makes items suitable for outdoor use
- Strength and stability tested for severe contract use (BS EN 16139:2013 Level 2). Exceeded the 200,000 cycles pass mark by a further 300,000 cycles

OPTIONS

- Floor fixing solution
- Linking bracket to connect chairs
- Lightweight model (16kg)
- Wide range of vibrant shell colours

Wrap-around arms help those with reduced mobility

RYNO[®] ARMCHAIR

Seat static weight tested to  450KG

Armchair
 1RYM-400
 835H | 1052W | 870D (mm)
 Seat height: 435mm
 Product weight: 27kg
 Weighted option: 71kg

Complements our Ryno[®] modular range (page 47)

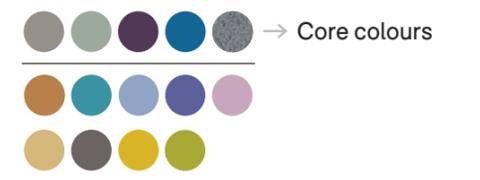

KEY FEATURES

- Rigid and durable polyethylene material provides excellent strength and cannot be weaponised unlike conventional furniture (please note: this product is not upholstered/padded)
- Integrated drainage channel allows water to run off
- Sloped arms and low back designed to minimise ligature risks
- Ergonomically designed to give excellent comfort

- Waterproof, UV stabilised material - suitable for outdoor use
- Hygienic wipe-clean surface
- Strength and stability tested for severe contract use
- Made with 40% recycled content
- 100% recyclable material

OPTIONS

- Available with additional weighting
- Optional linking bracket
- Wide range of vibrant shell colours

RYNO® CLUB CHAIR

Seat static weight tested to  450KG

Ryno club chair
 1RYC-02
 895H | 615W | 615D (mm)
 Seat height: 450mm
 Weight: 56kg

 Lifetime guarantee	 Weighted to deter misuse
 Fire retardant	 100% LDPE
 Weatherproof	 Floor fixed option

KEY FEATURES

- Heavily weighted to 56kg as standard to deter misuse (other weight options available)
- Carefully considered curved design minimises ligature risks
- Strength and stability tested for severe contract use (BS EN 16139:2013 Level 2). Exceeded the 200,000 cycle pass mark by a further 300,000 cycles
- Hygienic wipe-clean material
- Waterproof, UV stabilised material makes items suitable for outdoor use

RYNO[®] OCEANGREEN

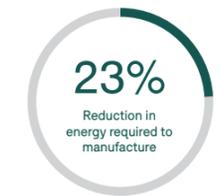

Helping to keep our oceans clean

Abandoned or lost fishing equipment accounts for around 10% of the plastics that end up in our oceans.¹

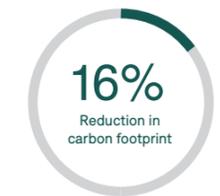

“Ghost nets” like these can be harmful to sea life with fish, birds, crabs and other species becoming tangled in them and attracting larger animals like dolphins and whales which can also become trapped. They can also cause damage to sea beds and coral reefs by becoming snagged and shading them from sunlight.

By collecting these nets before they reach our oceans, and using them to manufacture our products, we’re minimising the harm abandoned nets can cause to our oceans.

By using *recycled* materials to manufacture *recyclable* products, we’re creating a sustainable supply chain.

By reducing the amount of virgin material used to produce our furniture, we reduce the energy consumption by 23%.

We’re assessing all of our products for carbon reduction opportunities. The OceanGreen material offers a 16% reduction in carbon emissions.

1 The nets are collected, preventing them from reaching our oceans.

2 The nets are washed, dried and shredded into fine strands.

4 OceanGreen products require 23% less energy to manufacture, and are themselves 100% recyclable.

3 The strands are mixed with 50% virgin polymer and extruded into granules.

DE-ESCALATION COUCH

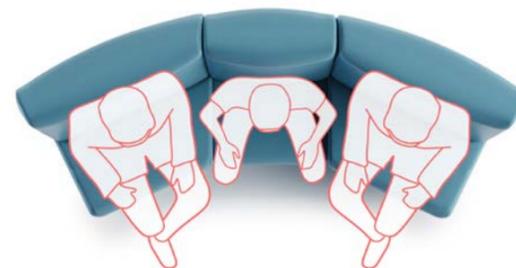

JAK

In situations where a patient is in severe distress and initial verbal de-escalation techniques have proven ineffective, physical intervention may be used as a last resort to prevent the patient causing harm to themselves and others.

During physical intervention staff will aim to restrict the patient's movements using the minimum force required, maintaining patient dignity. These interventions can be physically demanding, presenting risk of injury.

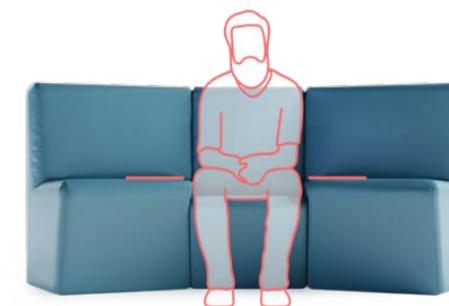

Through live service evaluations with clinical professionals, every angle of this couch has been optimised to support safer de-escalation practices for patients and staff alike.

ANGLED DESIGN

- Outer seats angled at 33° to allow closer patient engagement, aiding verbal de-escalation.
- Tapered footwell aides staff in safe de-escalation practices.

LOWERED CENTRAL SEAT

- Helps to control lateral movement.
- Gives staff superior leg control.

UPRIGHT SEATING POSITION

- Preserves patient dignity.
- Supports staff in de-escalation processes.

Evidence-based design providing support when it's needed most.

Beneficial for all levels of intervention.

Designed and developed in association with:

Andy Johnston Associates

Andy Johnston is a Clinical Director and independent mental health consultant with over 32 years of experience in mental health services including conflict resolution and physical intervention.

"Staff body positions are supported throughout a seated intervention - great to see such a design"

Physical intervention specialist

KEY FEATURES	OPTIONS	
<ul style="list-style-type: none"> → Outer seats angled inwards at 33° to provide staff back support → Lowered central seat and tapered footwell aids staff in safe de-escalation practices → Designed in conjunction with physical intervention specialists 	<p>→ Wide choice of water-resistant upholstery</p> 	<p><i>Designed to make physical intervention as safe and dignified as possible</i></p>

SEAL

Seal is made from soft-tec™ - a two-part molded polyurethane material which combines soft comfort with resistance and durability. The soft core in flexible polyurethane foam is bonded to an external water-resistant polyurethane skin. [below](#)

Made without seams or gaps, Seal is designed to reduce concealment risks in challenging environments.

Designed without seams to prevent concealment and provide water resistance

KEY FEATURES	OPTIONS	
<ul style="list-style-type: none"> → Designed without seams or gaps to minimise concealment opportunities → Anti-concealment base with non-accessible fixings → Subtle arms support staff in safe de-escalation practices → Water-resistant, hygienic outer skin which can be easily cleaned and dried for re-use 	<ul style="list-style-type: none"> → Additional weighted options available → Available in dual-tone colours: <div style="display: flex; flex-direction: column; align-items: center;"> <div style="display: flex; align-items: center; margin-bottom: 10px;"> Azur Blue <div style="display: flex; gap: 10px;"> <div style="width: 15px; height: 15px; background-color: #1a522d; border-radius: 50%;"></div> <div style="width: 15px; height: 15px; background-color: #3498db; border-radius: 50%;"></div> </div> </div> <div style="display: flex; align-items: center;"> London Grey <div style="display: flex; gap: 10px;"> <div style="width: 15px; height: 15px; background-color: #555; border-radius: 50%;"></div> <div style="width: 15px; height: 15px; background-color: #999; border-radius: 50%;"></div> </div> </div> </div>	

LEVO

REDUCED LIGATURE RECLINER

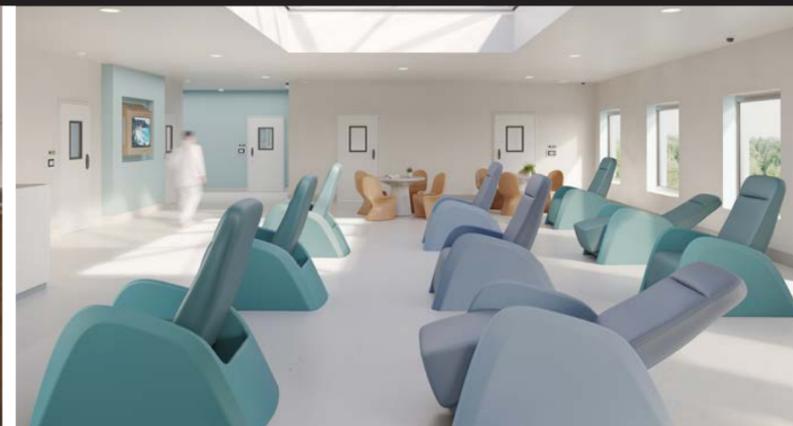

Many reclining chairs can present safety risks in mental health environments, either due to their controls (handles, buttons and electric handsets) or their reclining mechanisms, which may be tampered with or used as a ligature point.

The Levo reduced-ligature reclining chair has been designed to minimise these risks. Activated by body weight alone, there are no external controls, and the reclining mechanism is concealed to minimise ligature risks.

Concealed reclining mechanism minimises ligature risks

Activated by bodyweight alone, with no buttons or levers

LEVO

Weight: 27kg

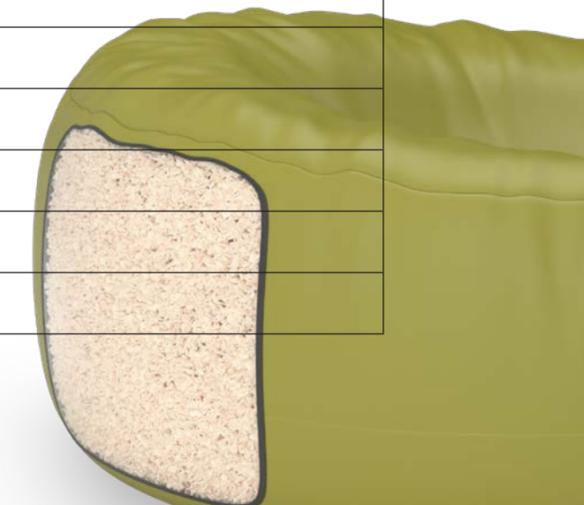

Donut & XL filling made from 100% recycled content

KEY FEATURES

- Double-stitched seams and non-accessible zips prevent tampering
- Flame retardant filling gives the beanbags their shape and comfort
- Donut and XL filling features 100% recycled content, left over from manufacturing our other seating products

OPTIONS

- Wide choice of water-resistant upholstery (we recommend a dark coloured wipe-clean vinyl)

EVIDENCE-BASED DESIGN

As part of the development process of the Boden Rocker, we trialled a prototype at two mental health hospitals (Adult and CAMHS) and sought feedback from healthcare professionals.

This valuable feedback helped our design team to refine the design to achieve maximum benefit for the users and caregivers.

DESIGNED IN ASSOCIATION WITH HDR

The Boden Rocker was designed in association with Jason Beshore, Health Principal at HDR Architecture.

As part of his work designing behavioural health spaces, he noted patients self-soothing by rocking back and forth on the floor rather than using available rocking chairs. After talking to care providers and conducting research to learn more, Jason presented us with a concept, and our product design team set to work bringing this concept into reality, creating a prototype which was trialled in a live environment.

TACTILE, PROPRIOCEPTIVE AND VESTIBULAR INPUTS

The Rocker is designed to provide gentle, controllable vestibular stimulation, helping to comfort and calm those in crisis.

The shape, size and softness of the product also offer tactile (touch) and proprioceptive (sense of body positioning) inputs which provide a supportive feeling of reassuring wrap-around contact.

These attributes are particularly important in mental health settings where staff are unable to provide physical contact like a reassuring hug to those in crisis.

A SUSTAINABLE CHOICE

As part of the manufacturing process of our other seating products, small pieces of waste foam are generated. We use this waste foam as fillings for our beanbags, reducing our CO2 emissions.

The plastic base of the Rocker is made from 100% recycled polyethylene.

The Boden Rocker is made from 64% recycled content, which means the carbon footprint of the product is reduced from 173kg to 47kg of CO₂ – a 72% decrease.

*“The patient’s seclusion/restraint episodes decreased in frequency by nearly 75%.
When the patient did have episodes of aggression or self-injury, they were significantly shorter and less intense overall”*

NIGHTINGALE AWARDS 2023 **Gold Award**

NIGHTINGALE AWARDS 2023 **Innovation Award**

KEY FEATURES

- Gentle, controllable vestibular stimulation provides comfort and calm
- Donut shape provides a reassuring feeling of wrap-around contact
- Seating position close to the ground provides a feeling of safety
- Raised back offers head and neck support

- Large size and weight prevents the beanbag being picked up
- Recycled plastic base which is textured to provide grip and prevent the product moving along the floor
- Made from 64% recycled content, contributing to a 72% reduction in CO2 emissions

OPTIONS

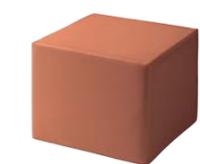

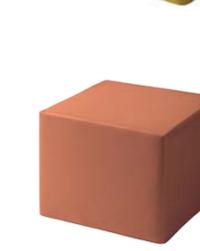

- Available in a wide range of water-resistant upholstery

870H | 1428W | 18D (mm)

KEY FEATURES

- 28mm side panels for strength with solid reinforced under rails
- Enclosed base to minimise concealment opportunities
- Heavyweight to deter misuse
- Smooth rounded corners for safety

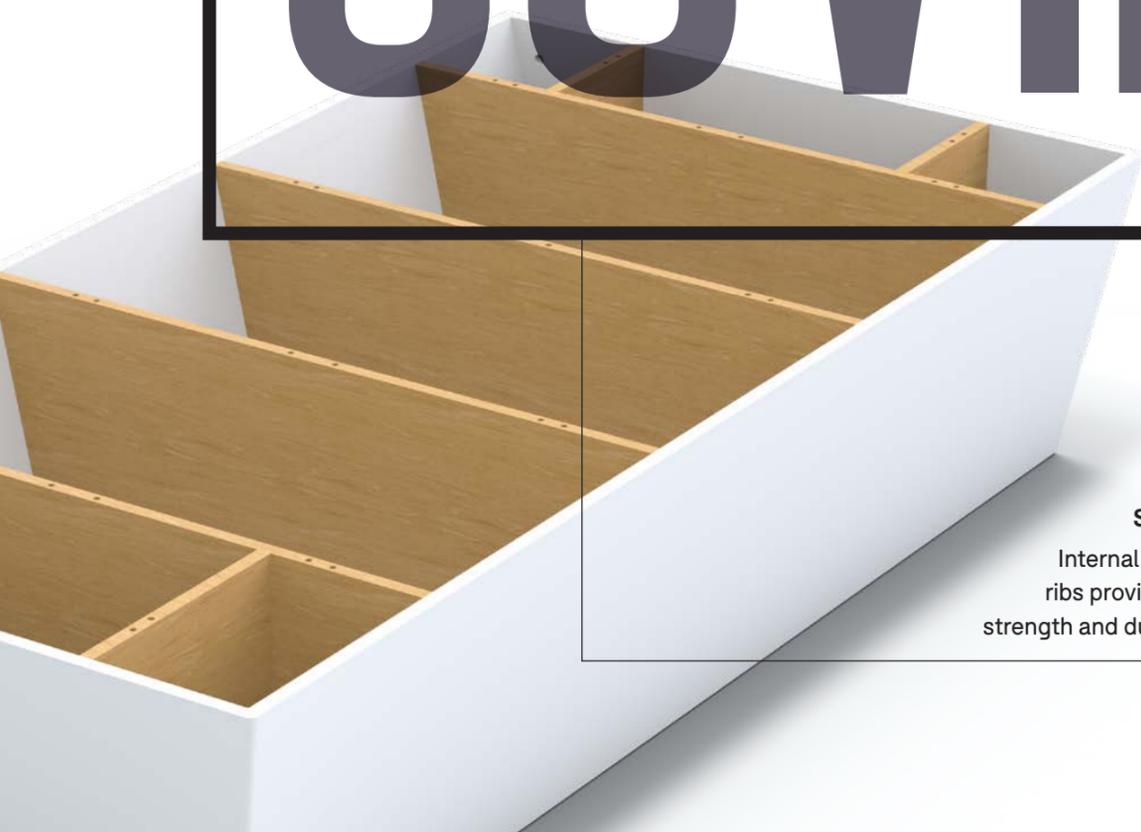

OPTIONS

→ Available in Hickory and Walnut finish

SOVIE

This range has been designed to provide an ideal safety solution for beds in challenging environments.

Strength
Internal support ribs provide extra strength and durability.

Water resistance
Sovie's one-piece mattress platform has no joints or crevices through which liquid can permeate, preserving hygiene and infection control levels.

DURA-TEC material

The Sovie bed is coated in DURA-TEC – a tough plastic which is commonly found in aircraft interiors. Kydex is an extremely durable finish which withstands impact and is resistant to tough chemical cleaners.

Flame retardant

DURA-TEC has flame retardant properties:

- Achieves Class A rating (the highest) for ASTM E-84* surface burning characteristics of building materials
- Is self extinguishing in the absence of an external flame

Anti-bacterial

DURA-TEC resists bacterial and fungal development:

- It provides no source of nutrients (unlike some other plastics)
- Passed ASTM G-21* (bacteria) and ASTM G-22* (fungus) by supporting no bacterial or fungal growth

Chemically resistant

DURA-TEC remains unaffected by some of the harshest chemicals:

- 70% Nitric acid
- 30% Sulphuric acid
- 10% Hydrochloric acid
- Ammonia
- 3% Hydrogen

Installation

Beds can be securely fixed to the floor, using infill panels to minimise concealment opportunities when positioned against a wall.

FORM Pressure relieving mattress

Form pressure relieving mattress
1FO7-001-5
180H | 1900L | 900W (mm)

KEY FEATURES

- 5 layers of specialist foam designed to provide long-term comfort and support
- Castellated layer aids air flow and flexibility
- Firm base and sides provide stability
- Compliant with flammability standard BS 6807:2006 Crib Ignition source 5, Clause 9
- Pressure map data available on request
- Hygienic wipe-clean polyurethane cover with water-resistant welded seams

MONSOON Pressure relieving mattress

Monsoon single 3' mattress
1NM3-001-5
180H | 1900L | 900W (mm)

KEY FEATURES

- Single-layer pressure relieving CMHR foam interior
- Water-resistant heat-welded seams to prevent liquid penetration – ideal for incontinence

AQUARIUS

	Single 3' (915mm)	Small double 4' wide (1220mm)	Double 4'6" wide (1370mm)
Mattress	1AQM-002 125H 1900L 915W (mm)	1AQM4-001 125H 1900L 1220W (mm)	1AQM-004 125H 1900L 1370W (mm)

KEY FEATURES

- Open-coil sprung mattress interior
- Layers of insulation and quilting for comfort
- Water-resistant, anti-bacterial breathable cover

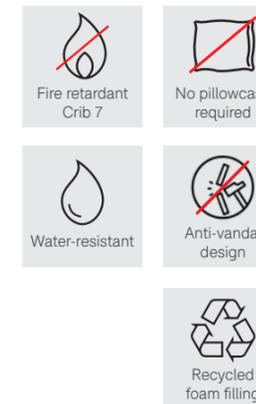

Please note: Fluid can still penetrate stitching. For fully waterproof mattresses, please our foam mattresses.

NORA TEAR-RESISTANT PILLOW

Nora tear-resistant pillow
1NR-500-GR
120H | 550W | 400D (mm)
Weight: 0.83kg

Vent allows air to move freely while protecting from fluid ingress

Designed for the most demanding environments, Nora is an anti-vandal pillow which complies with the very highest flammability standards, and avoids the need for a pillowcase – something which could otherwise pose a safety risk.

Comfortable and soft to the touch but resistant to damage, Nora's heavy-duty covering and welded seams work together to create a water-resistant and anti-vandal pillow. An integrated hydrophobic vent allows air to move freely while protecting the interior of the pillow from fluid ingress.

Inside, a fire-retardant liner surrounds the supportive filling made from 100% recycled polyester fibre filling. Nora has been tested to Crib Source 7, making it suitable for locked establishments like custodial facilities.

KEY FEATURES

- Comfortable and soft - no pillowcase required
- Heavy duty anti-vandal cover is made for extra challenging environments
- Soft yet secure material is ideal for seclusion
- Hygienic wipe-clean surface
- Breathable design with an air vent fully welded on the side of the pillow
- Rated to Crib Source 7, with a fire-retardant interliner and filling

NEXT STEPS

NOW IT'S TIME TO

MAKE ANY FABRIC

CHOICES AND PLACE

YOUR ORDER

UPHOLSTERY

We provide an extensive range of water-resistant fabrics and vinyls to ensure that you will find the right finish for your furniture.

Fabrics

A durable option which combines the comfort of soft fabric with practical water-resistant properties. Please be aware, these fabrics are more susceptible to stains than vinyl.

Call us to request your fabric swatch cards to see the full choice available.

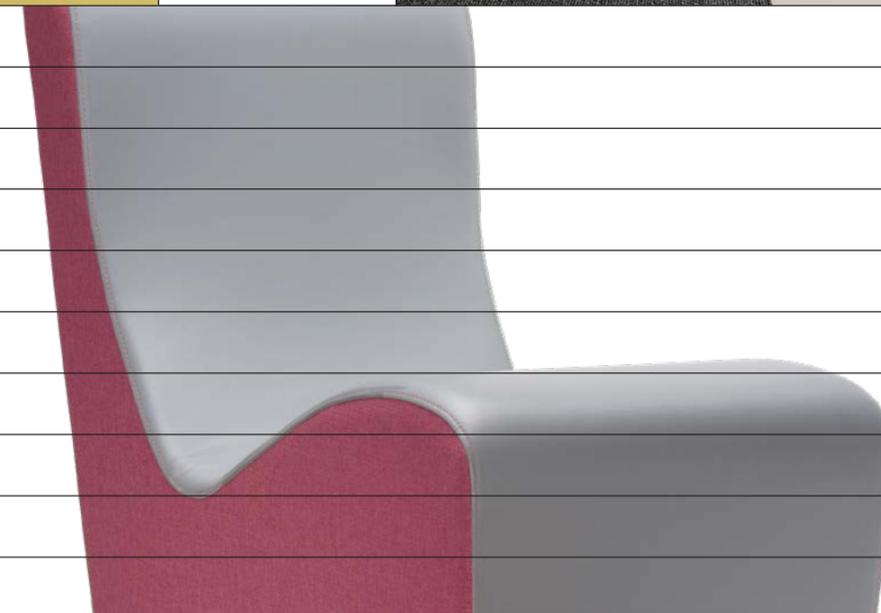

Vinyls

Hard wearing and water-resistant, leather-effect vinyls can be wiped clean which makes them a hygienic and practical option for healthcare environments.

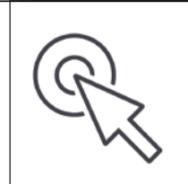

Call us to request your fabric swatch cards to see the full choice available.

Some of our ranges are available using dual fabrics to add multiple textures and colours to one item of furniture.

Please note: Cracking and stickiness on vinyl fabrics are known issues to fabric manufacturers. As furniture manufacturers, Pineapple cannot accept responsibility.

HOW TO PLACE YOUR ORDER

Step		Step		Step	
01	Pick your furniture	02	Pick your fabric or finish	03	Get in touch for a quote
					
			Visit our website to see our latest fabrics and request a free swatch
