

STABILITY TEST

Ryno Combo Table- Outdoor

Sample: Ryno Combo Table
2400 x 1200mm

Date: 25/03/2026

Testers: Jonathon Drummond &
Lizzie Waters

Reason for test: Stability and tip test

Test Type	Photos	Comments (including pass/fail)
Tip Test (unweighted)		The table held 5 sandbags (112.5kg) and when the 6th bag went on the table tipped over (135kg). Only minor surface damage occurred to the table top. - Pass
Tip Test (2 sandbags [45kg each] in each pedestal base)		The table held 6 sandbags (135kg) a further 6kg sandbag was added and this tipped the table, a total of 141kg. Only minor damage occurred to the table top. -Pass

Summary

The weighted table supported 22.5kg more before tipping than the unweighted table, increasing the maximum load from 112.5kg to 135kg with two 45kg sandbags placed in the pedestals.

Only minor cosmetic damage occurred during testing, including scratches and small chips to the tabletop, with no structural failure observed.
