

Pineapple

In association with HDR

KEY FEATURES

- Iconic design classic reimaged
- Made in the USA and distributed globally
- Heavily weighted to 18kg as standard to deter misuse (other weight options available)
- Hygienic wipe-clean material
- Wider footprint for further stability and wall-saver design for closer wall placement
- Water-resistant material which is 100% recyclable
- UV stabilised and suitable for outdoor use
- Sensory ripple detail on the arms of chair
- Strength and stability tested for severe contract use

MATERIAL/FABRICATION

Developed in association with Brian Giebink, NCARB, AIA, LEED AP BD+C, EDAC (Architect | Director of Behavioural Health at HDR), the **Ryno® Adirondack** reimagines the iconic Adirondack chair for challenging environments. Combining Giebink's experience in behavioural health design with Ryno's focus on strength, safety and durability, it retains the familiar slatted-back appearance, generous seat platform and wide armrests of the traditional design, creating a supportive and relaxed seating position.

Manufactured from a single piece of rotationally moulded, low-density polyethylene (LDPE), the chair has no joins, seams or separate components. This one-piece, non-porous construction provides excellent strength and durability while creating a UV stabilised, water-resistant, hygienic surface that is easy to clean, contains no organic matter that could provide a food source for bacteria or bedbugs, and is 100% recyclable.

Heavily weighted to approximately 18kg as standard, with alternative weighting options available, the chair is designed to deter misuse and provide greater stability. Its wider footprint further enhances stability, while the wall-saver profile allows it to be positioned closer to walls.

A sculpted form and subtle sensory ripple detailing help soften institutional spaces, while the chair is suitable for indoor and outdoor use and has been strength and stability tested for severe contract environments.

TEST STANDARDS

- Strength and stability tested to BS EN 16139:2013 – Level 2 (severe contract use)
- Fire retardant to BS 5852:2006 ignition source 5, CAL 133, UL 94 and DIN 66084
- Tested to ANSI/BIFMA X5.5:2012 standard
- NFPA 261 Standard Method of Test
- Antibacterial Activity MOD iso 22196:2011
- Ryno ISO 11925 (2020)

COLOUR/FINISH

OPTIONS

- Hidden hard floor fixing solution - 1RYE-F-00
- Unweighted model (18kg) - 1RYE-00
- Weighted model (62kg) - 1RYE-62
- Not available in Granite or OceanGreen colour/finish

DELIVERY

Core colours are held in stock and therefore typically offer shorter lead times and quicker dispatch. Non-core colour options may require longer lead times and can incur additional costs.

Please note that this product is manufactured in the USA and distributed globally. For the most accurate information on current lead times, delivery options and associated costs, please contact our helpful sales team.

ASSEMBLY

Arrives assembled and ready to use

INSTALLATION/FITTING

Additional weighting can be carried out prior to delivery. All products must be installed carefully in accordance with Pineapple's product instructions (where provided). Failure to do so may void the product warranty.

Please note: The hard floor fixing kit is only available with the unweighted chair option.

MAINTENANCE

Do not use abrasive materials, harsh cleaning agents, solvents, steam cleaners, or pressure washers. Bleach and chlorine-based disinfectants should be used with caution. Keep the product away from direct heat sources. For full care guidance, visit: <https://uk.pineapplecontracts.com/upholstery/care-guidance/>

WARRANTY

Lifetime guarantee against all manufacturing faults.

DISCLAIMER

Extreme temperature changes (e.g. a cold night followed by a warm sunny day) may cause air inside the product to expand, causing short-term changes to its shape.

Due to the nature of the rotational moulding process, flat surfaces on Ryno® products may feature slight undulations which do not detract from the product's strength or durability.

Due to the open arm design of the Ryno Adirondack, this product is recommended for environments where ligature risk is not a primary concern.
