

RYNO[®] ADIRONDACK

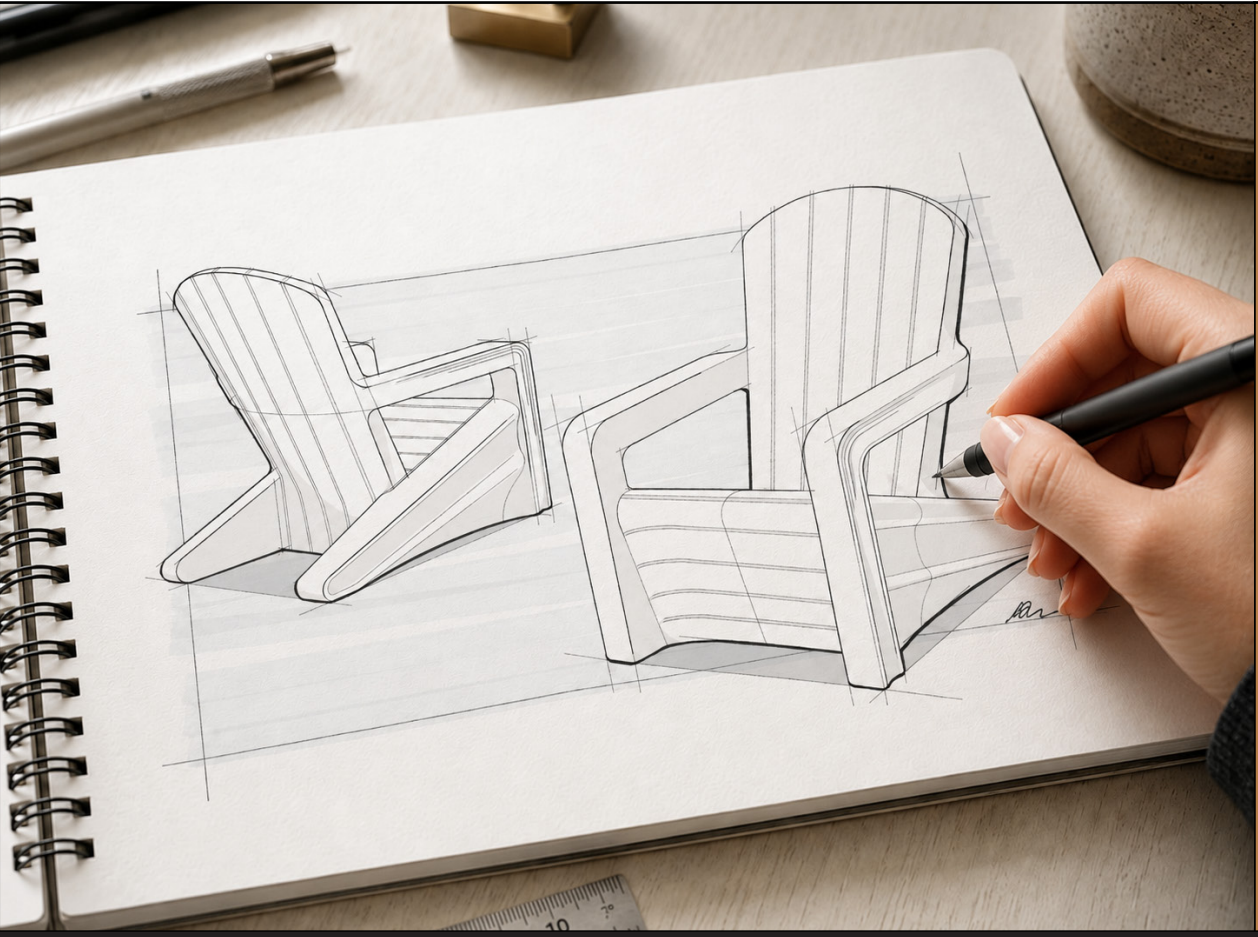

An iconic design, reimagined
for challenging environments

Developed in association with Brian Giebink (Architect Director of Behavioural and Mental Health at HDR), the Ryno® Adirondack reimagines the iconic Adirondack chair for challenging environments. Combining Giebink’s experience in behavioural health design with Ryno’s focus on strength, safety and durability, it retains the familiar slatted-back appearance, generous seat platform and wide armrests of the traditional design, creating a supportive and relaxed seating position. Its sculpted form brings a more welcoming feel to secure environments, helping create outdoor healthcare spaces that support comfort, dignity and wellbeing. Subtle sensory ripple detailing on the arms adds tactility and character, while the reduced-ligature, one-piece construction supports safer use	without compromising the chair’s familiar aesthetic. A wide footprint and approximately 18kg standard weight provide reassuring stability, with additional weighting options available where required. Optional floor fixing can further enhance security and help deter misuse. The wall-saver profile also allows the chair to sit closer to walls, supporting more considered space planning. Made from 100% recyclable, seamless and non-porous rotationally moulded LDPE, the Ryno Adirondack is durable, water-resistant, UV stabilised and easy to clean, making it suitable for both indoor and outdoor use.	

“

There's an opportunity to introduce something very familiar, very comfortable and very relaxing to the behavioural health space. Adirondack chairs are a symbol of relaxation, comfort and being outdoors.

”

Brian Giebink, NCARB, AIA, LEED AP BD+C, EDAC, is an architect and Director of Behavioural and Mental Health at HDR, specialising in the design of environments that support safety, wellbeing and positive experiences for patients, staff and visitors. His expertise in behavioural health design brings a practical, human-centred perspective to Pineapple's development of the Ryno® Adirondack.

“I believe it's essential to the patient's healing journey to have access to fresh air and outdoor space”
