

RYNO[®] SAFEWASTE

Reduced-ligature waste bins
for safer environments

Pineapple

The disposal of waste can present a number of safety risks in mental health environments. Components commonly found on waste bins designed for general healthcare settings, such as pedals, hinges and openings, may be exploited to create ligature points. Unsecured waste bins may also be picked up and thrown, posing a risk of injury to staff and residents, or moved and climbed on to access unsafe areas. Furthermore, traditional bin liners may present additional self-harm risks. The Ryno SafeWaste range offers two reduced-ligature waste bin options, specifically designed to address these challenges in mental health and other challenging environments. Available in two capacity options and suitable for both indoor and outdoor use, the range provides a versatile waste management solution for a variety of settings.	Both bins feature a gently sloping profile, designed to minimise ligature risks and deter climbing. The openings have been carefully considered to reduce potential ligature points, while helping to minimise spillages should the bins be overturned. A secure locking system allows staff to unlock and empty the bins quickly and efficiently before safely re-locking them. Inside, rigid, washable waste containers replace traditional disposable bin liners, reducing associated safety risks while supporting hygiene and ease of maintenance. For enhanced security, the Ryno SafeWaste range offers a choice of an innovative concealed floor-fixing system or optional weighting, helping to prevent the bins from being lifted, moved or misused.	

RYNO[®] SAFEWASTE

Ryno SafeWaste
1RYQ-00
838H | 450W | 450D (mm)
Weight: 10.5kg
Capacity: 25 litres

*The rigid internal bin removes
the need for liner bags,
reducing ligature risks*

Lifetime guarantee

100% LDPE

Fire retardant

Added weight option

Weather proof

Floor fixed option

KEY FEATURES	OPTIONS
→ Sloping design features and the inside of the opening are carefully designed to minimise ligature risks → Securely locked by staff to prevent unauthorised access → Recommended for supervised areas → 25 litre internal washable bin avoids the safety risks normally associated with liner bags → Narrow opening reduces spillages in the event of overturning → 100% waterproof hygienic surface will not rust → Polyethylene material is 100% recyclable → Base made from 100% recycled content	→ Available as a floor fixed option → Available as a heavyweight option (51kg) → A wide range of colour options, excluding OceanGreen → Core colours Minimum order quantity of 12 units

DESIGNED FOR PEACE OF MIND

Reduced-ligature design

The sloping design features and the inside of the opening are carefully designed to **reduce ligature risks**.

Secure access

The outer casing remains secured to the base until unlocked with a key, **prevents access to waste within**.

Floor-fixed option

The innovative **hidden floor fixing system** prevents the SafeWaste unit from being picked up or moved.

Heavyweight option

Additional weight can be added to prevent the SafeWaste unit from being picked up.

Organic shape

The softly contoured organic shape is designed to **benefit the aesthetics** of the environment.

Hygienic material

100% waterproof and easy to clean, SafeWaste's polyethylene material and **will not rust**.

Internal Bin

The 25 litre internal bin **removes the need for liner bags**, reducing ligature risks.
